

Green Finance Framework

22 October 2025

Summary

DNB's Green Finance Framework –
Issuance of green covered-, senior- and tier 2 bonds

Proceeds will be used to finance green residential
buildings, renewable energy and clean transportation

Structured in line with the ICMA Green Bond Principles
and partially aligned with the EU Taxonomy

Second Party Opinion (including EU Taxonomy
assessment) from Sustainalytics

Impact reports from Multiconsult and Carbon Trust

Use of proceeds - overview

DNB Boligkreditt AS

Green Residential Buildings

New or existing
residential buildings in Norway:

- i. **Built <2021:** within the **top 15% low carbon buildings**
- ii. **Built ≥2021: NZEB-10%**

DNB Bank ASA

Green Residential Buildings

New or existing
residential buildings in Norway:

- i. **Built <2021:** within the **top 15% low carbon buildings**
- ii. **Built ≥2021: NZEB-10%**

Renewable Energy

- **Solar** power projects
- **Wind** power projects (onshore/offshore)
- **Hydro** power projects
- **Transmission and storage systems**

Clean Transportation

- **Zero Carbon Vehicles**
- Zero Carbon Transportation Infrastructure

- Identification of the most energy efficient (low carbon) buildings:
 - Residential buildings completed in the period from 2012 to 2020 (complying with TEK10 & TEK17 building codes)¹⁾
 - Residential buildings completed in 2021 or later complying with the NZEB -10% threshold²⁾
- Assessment by Sustainalytics concludes that the portfolio of green residential buildings is aligned with the relevant EU Taxonomy criteria

The Eligible Portfolio has an estimated average energy demand of less than 50% of the average Norwegian demand

¹⁾ Within the top 15% "best in class"-approach, demonstrated by way of proxies based on statistical analysis carried out by Multiconsult.

²⁾ In accordance with the EU Taxonomy Climate Delegated Act, buildings built from 1 January 2021 onwards should meet the 'NZEB -10%' criterion. Compliant buildings are assessed against the respective NZEB threshold published by the Norwegian Ministry, expressed as specific energy demand in kWh/m². At the time of writing all Norwegian buildings with EPC labels of A and some EPC B labels are compliant. The full methodology and selection approach used for NZEB-10% compliant buildings will be published in a technical report from a specialised external consultant.

Renewable Energy

~NOK 31 bn eligible green assets

- Solar power ~NOK 13 bn
 - Photovoltaic and concentrated solar power energy projects
- Wind power ~NOK 10 bn
 - Onshore and offshore wind energy projects

- Hydro power ~NOK 3 bn

One of the following requirements are met:

- the facility is a run of river plant and does not have an artificial reservoir
 - the power density of the electricity generation facility is above 5W/m²
 - the lifecycle emissions from the generation of the electricity from hydropower are lower than 100g CO₂e/kWh
- Electricity transmission, distribution, storage systems and mixed portfolio¹ ~NOK 5 bn
 - Transmissions systems (or other infrastructure) to facilitate the integration of electricity from renewable energy sources into the grid
 - Construction and operation of facilities that store electricity and return it at a later time in the form of electricity (including pumped hydropower storage)

¹⁾ Includes Solar, Wind and Battery

- Zero carbon vehicles
 - Fully electric, hydrogen or otherwise zero direct (tailpipe) emissions vehicles for the transportation of passengers or freight
- Zero carbon transportation infrastructure
 - Infrastructure related to zero direct (tailpipe) emissions vehicles including, but not limited to, EV charging stations and hydrogen fueling stations
- Fulfil EU Taxonomy Substantial Contribution- and minimum social safeguards criteria
 - All vehicles must have zero direct (tailpipe) CO2 emissions
 - Infrastructures include EVs charging stations
 - The infrastructure is dedicated to the operation of vehicles with zero tailpipe CO2 emissions that do not transport or storage fossil fuels

- *"Sustainalytics is confident that DNB is well positioned to issue green bonds and loans and that the **DNB Bank ASA Green Finance Framework is robust, transparent and in alignment with the four core components of the Green Bond Principles 2021 and Green Loan Principles 2023**"*
- *"Sustainalytics believes that the Green Finance Framework is aligned with the overall sustainability ambitions of the Bank and that the **Green use of proceeds categories will contribute to the advancement of the UN Sustainable Development Goals 7, 9 and 11**"*
- *"Sustainalytics is of the opinion that the criteria defined in the Framework's three use of proceeds categories **are aligned with the applicable Technical Screening Criteria ("TSC") and 23 of the Do No Significant Harm ("DNSH") criteria**. 12 DNSH were assessed as partially aligned. Sustainalytics is also of the opinion that the activities and projects to be financed under **the Framework will be carried out in alignment with the EU Taxonomy's Minimum Safeguards.**"*

EU taxonomy assessment

Performed by  SUSTAINALYTICS

Alignment %		~60% aligned (NOK ~121bn / NOK ~203bn total portfolio)		
Eligible Green Asset Category	Green Residential Buildings	Renewable Energy (Wind, Solar & Hydropower)		Clean Transportation
Geography	Norway	EEA + UK 22% of Renewables	Rest of World 78% of Renewables	Norway, Sweden, Denmark, Finland
Substantial Contribution to Climate Change Mitigation	Aligned	Aligned		Aligned
Do No Significant Harm	Aligned	Partially Aligned ¹⁾		Partially Aligned ²⁾
Minimum Social Safeguards	Aligned	Aligned		Aligned

¹⁾ For assets outside the European Economic Area (EEA) + UK region, DNB is not able to provide specific documentation to substantiate full alignment with all the respective applicable DNSH criteria, which often relate to specific EU Directives. This is largely due to the misalignment with national regulations and the Equator Principles requirements with specific EU Directives & EU Taxonomy requirements. **DNB requires all project finance to be in compliance with the Equator Principles**, where an Environmental and Social Impact Assessment (ESIA) is an integral part. **In addition, ESG factors are built into DNB's risk assessment process.** Sustainalytics has therefore concluded 'partial alignment' on DNSH for Renewables outside the EEA and the UK.

²⁾ Electric Vehicles are assessed as not being able to meet the Pollution Prevention & Control DNSH criteria relating to tyres, given that currently almost all new electric car models are (factory) fitted with non-compliant tyres, or exact tyre information is not available.

Management of proceeds

- The proceeds of the green finance instruments issued will be managed in a **portfolio approach**
- DNB will strive, over time, to achieve a **level of allocation for the Eligible Green Loan Portfolio which matches or exceeds the balance of net proceeds from its outstanding green finance instruments**
- **Eligible Green Loans will be added to or removed** from DNB's Eligible Green Loan Portfolio to the extent required
- **Unallocated net proceeds** from Green Finance Instruments will be held in DNB's treasury liquidity portfolio, in cash or other short term liquid instruments, at DNB's own discretion

DNB Green Bonds

DNB has established a green finance framework which enables DNB to issue Green Senior Bonds and Green Covered Bonds.

The framework is established in line with the ICMA Green Bond Principles and follows best market practice.

DNB's eligible green loan portfolio consists of three categories: Green Residential Buildings, Renewable Energy and Clean Transportation.

DNB has appointed Multiconsult and Carbon Trust to provide an impact assessment for the separate categories, see impact reports below. Additionally, DNB has obtained a second party opinion from Sustainalytics, which includes an assessment on the alignment of the portfolio with the EU Taxonomy, and a limited assurance report from Multiconsult.

Green Bonds suit well with DNB's overall strategy, where Corporate Responsibility has been raised as one of four priorities to be incorporated in all processes in DNB.

ESG in the credit process

- ESG is **part of the risk assessment** for all corporate loans:
 - EAD > NOK 50 million: Sector-specific ESG risk assessment models for material sectors, including SMEs
 - EAD between NOK 50 and 8 million: Comments on ESG risk factors must be included in all credit proposals
 - EAD < NOK 8 million: Comments on ESG issues for clients with observed negative deviations must be included in credit proposals
- All new and refinanced shipping loans include a **clause on responsible ship recycling**
- Green loans receive a certain discount

Diversity and inclusion

- Established internal goal in 2015 of **40% female representation on management levels 1-4**
 - Q3 2025: 37.5% share of women at management levels 1-4
 - Q3 2025: 60% and 50% proportion of women on the Board of Directors and in the Group Management, respectively
- Using **purchase power to promote diversity and equal opportunities** – law firms, IT and consultancy services.
 - Key performance indicators included in contracts with relevant suppliers
- Increased focus on equal financial opportunities** through #girlsinvest campaign launched in Sept. 2019
 - Since launch of the campaign until YE 2023: **14% increase in female founders** and **240% new female mutual fund owners** through DNB

- BCG Gender Equality Index 2023: DNB rated as no. 2 among European banks
