Report for the first six months of 2003

Gjensidige NOR ASA posted a net profit of NOK 1,140 million for the first half-year, an increase of NOK 258 million over the same period of 2002. Underlying operations are sound, more than compensating for higher loss provisioning. The result before loss provisions and tax was up NOK 435 million on last year, due to improved net interest income, higher capital gains and a considerably improved result for Life Insurance and Pensions. Earnings per share came to NOK 13.10 for the first half and to NOK 6.56 for the second quarter, representing an advance of almost NOK 3 on the first half of 2002. Disregarding goodwill amortisation, earnings per share were NOK 14.29 for the first half and NOK 7.15 for the second quarter of 2003. First-half return on equity was 13.6 per cent, up 2.7 percentage points. Group return on equity before goodwill amortisation amounted to 14.8 per cent in the same period.

INCOME

Interest rates fell significantly in the first half-year. Since November 2002 Norges Bank lowered its key rate on five occasions by a total of 3 percentage points. The interest rate fall in isolation reduced the company's direct return on equity by 1.5 percentage points between the first half of 2002 and the first half of 2003. For the full year 2003 this will weaken the result by about NOK 190 million, about half of which is reflected in the first-half figures.

At NOK 2,912 million, net interest income was NOK 136 million up on last year's figure. The customer spread, averaging 2.75 per cent this year compared with 2.89 per cent last year, weakened the result by about NOK 70 million. This is largely attributable to low interest rates which make it unfeasible to maintain the spread on current accounts representing about NOK 9 billion of total deposits. The reduced spread was however more than compensated for by higher deposit and loan volumes.

Norges Bank's 3 percentage point rate reduction will be fully priced into the bank's portfolio as from 1 August 2003, by which time the best mortgage interest rate will be 3.08 percentage points lower in effective terms. The bank has concurrently reduced its deposit spread. The fall in interest rates enables the bank to price risk more correctly, bringing a rise in the spread on corporate lending.

As of end-June 2003, year-on-year growth in deposits was 7.9 per cent. In the first half of 2003 deposit volumes remained virtually unchanged. Overall lending grew by 10 per cent in the 12 months to end-June, with loans to retail customers rising 10.8 per cent and to corporate customers 9.1 per cent. Overall first-half lending growth came to 6.2 per cent.

At NOK 1,224 million, net other operating income was NOK 148 million higher in the first half of the current year than in the same period last year. The bulk of the increase, which took place in the second quarter, is ascribable to higher capital gains, essentially as a result of interest rate developments in the money and bond market. While income from share market activities remains low, market activity shows a slight increase and some signs of higher demand for alternative savings products are in evidence.

COSTS

Group costs, which rose by NOK 61 million to NOK 2,385 million in the first half-year, are well under control. On a comparable basis, growth came to NOK 13 million or 0.6 per cent. Sound cost control combined with rising income produced a cost-income ratio of 0.56 in the second quarter.

Group staffing was reduced by 144 FTEs to 4,056 FTEs in the first half-year. For the full year 2003 staffing is to be reduced by 200 FTEs, thereby enabling a cost reduction of NOK 100 million. As of end-June the rate of cost reduction was just under NOK 70 million on an annual basis.

LOSS PROVISIONS

At NOK 332 million, net losses were NOK 172 million higher in this year's first half than in the same period last year. In the second quarter in isolation net losses totalled NOK 251 million, NOK 146 million above last year's figure. The loan portfolio is amply diversified, and exposure to industries that are particularly at risk in the current situation is modest. A breakdown of losses by industry and size of commitment confirms that the portfolio remains sound.

Losses on loans to business customers totalled NOK 250 million. Risk concentration in the corporate customer segment is low and no customer is in receipt of loans in excess of 10 per cent of the bank's capital base.

Losses on loans to the retail segment amounted to NOK 50 million, referring essentially to the credit card operation, Cresco. Cresco's losses are NOK 18 million down on the first half of last year. Net defaults recorded by Cresco were at a stable 3.3 per cent in the quarter under review.

Net defaults rose from 0.77 per cent of overall loans in last year's first half to 0.84 per cent this year. At end-2002 net defaults measured 0.91 per cent of loans. The portfolio is closely monitored. Doubtful, non-defaulted loans rose by NOK 240 million in the first half of the current year.

CAPITAL ADEQUACY

At end-June Gjensidige NOR ASA's capital ratio stood at 11.3 per cent. Core capital adequacy was 7.9 per cent, excluding first-half net profit. The capital base totalled NOK 24.5 billion, with core capital at NOK 17.2 billion.

FURTHER ISSUES

At an extraordinary general meeting held by Gjensidige NOR ASA on 19 May, the planned merger with DnB Holding ASA received a clear majority of 85.55 per cent of the shares present.

An application for the licence needed to carry out the merger was sent to the Ministry of Finance on 20 May. The Competition Authority is examining the competitive aspects of the merger, and has to give notice of any objections no later than three months after the licence application was sent. The Competition Authority must complete its consideration by 19 November 2003.

DnB NOR will comprise five business units: Retail Banking, Corporate Banking, Markets, Asset Management and Life Insurance and Pensions, along with five support functions, viz. Finance; Strategy and Development; Group Communications; IT and Payment Services; and Group Human Resources, Organisation Development and Group Services. A substantial effort has been initiated to plan the integration of the two groups.

REPORTS FROM THE BUSINESS UNITS

SAVINGS BANK

Savings Bank services retail customers and SMEs. Improved earnings and reduced costs increased pre-loss operating profit by NOK 102 million to NOK 953 million in the first half-year.

Despite general pressure on spreads due to lower interest rates, Savings Bank's first-half earnings were NOK 54 million higher than in the same period of 2002. The growth in earnings is attributable to higher business volume and improved pricing of the bank's products and services.

Overall lending grew by NOK 10 billion (8 per cent) in the 12 months to end-June. Lending to the retail segment grew 11 per cent in the period. At end-June fixed interest loans accounted for 18 per cent of Savings Bank's overall lending.

Deposit growth in the 12 months to end-June came to just over NOK 7 billion (8 per cent). There was a slight reduction in balances on current accounts, while accounts related to long-term saving showed marked growth. In the latter part of the first half-year more than NOK 1 billion was invested in equity linked bank deposits. The switch to longer-term saving contributed to a reduction of 0.12 percentage point to 2.83 per cent in the average customer spread in the first half-year.

Costs were NOK 48 million down on the first half of 2002. This is essentially related to staff reductions of 64 FTEs this year and to a reduction in marketing costs.

At NOK 115 million, losses were NOK 80 million higher than in the first half of 2002. The increase refers primarily to the SME segment. As at end-June 2003 gross defaults amounted to NOK 1,475 million, down NOK 50 million.

CORPORATE CUSTOMERS

Corporate Customers services the largest private and public sector enterprises and organisations in the country. Corporate Customers' first-half pre-loss profit was NOK 214 million, NOK 30 million higher than in the same period last year.

Interest earnings rose by NOK 17 million to NOK 200 million. Higher deposit and loan volumes, exchange rate effects and up front receipts made a positive contribution, while lower deposit spreads reduced earnings somewhat. Up front receipts are higher mainly because a growing share of Corporate Customers' transactions reward the unit for its expertise and experience. In the first half-year the loan volume rose by NOK 3.1 billion (13.4 per cent). NOK 2.3 billion of the rise refers to ordinary volume growth on new and existing customers, NOK 0.5 billion are short-term drawings while NOK 0.3 billion is

attributable to exchange rate effects. The customer spread remained unchanged in the first half-year.

Other income rose by NOK 11 million to NOK 88 million due to higher commission earnings and higher receipts from money transfer services, the latter mainly related to new large-volume customers requiring sophisticated cash management solutions.

Corporate Customers has reduced its operating expenses by NOK 2 million to NOK 74 million. Efficiency has been improved and staffing reduced by 15 FTEs over the past 12 months.

Corporate Customers' provision for losses was moderate in the first half of 2003 at NOK 48 million, an increase of NOK 18 million over the same period last year. The unit maintains good portfolio quality and prospects for losses on loans and guarantees are moderate. A review of the portfolio shows stable client numbers and volume in the high-risk segment, while client numbers and volume in the low-risk segment are rising.

Gross defaults at mid-year totalled NOK 154 million, which is NOK 43 million lower than at the end of the first quarter.

CAPITAL MARKETS

Capital Markets delivers services in the areas of securities trading, mutual funds management, discretionary asset management and fixed income and foreign exchange products, as well as banking services to Norwegian and foreign banks. Income rose by NOK 87 million to NOK 399 million in the first half-year. Pre-tax profit for the same period came to NOK 153 million compared with NOK 51 million last year.

Currency and fixed income markets were still affected by falling interest rates in the second quarter, in Norway as elsewhere. A weaker krone and lower interest rates prompted high activity and good earnings in all of Markets' segments. Progress in advisory services and sales of structured products was positive.

The Financial Institutions Section delivered sound earnings in all business areas in the first half-year. A targeted customer effort produced increased business volume which is expected to generate good earnings in 2003.

Gjensidige NOR Equities has implemented a substantial turnaround. Despite a sluggish market and a negative first-quarter result, the company is now showing growth and is in a positive profit position. Volumes for corporate business are rising, and the company has strengthened its position in the secondary equity market.

As at end-June 2003 Gjensidige NOR Kapitalforvaltning had assets totalling NOK 116 billion under management, of which NOK 32 billion refers to clients outside the Gjensidige NOR Group. The supply of assignments from non-Group clients was satisfactory in the first half-year.

At end-June Avanse Forvaltning managed assets worth NOK 24.7 billion and its market share was 20.2 per cent. The second quarter saw increased investment in mutual funds which, together

LIFE INSURANCE AND PENSIONS

Gjensidige NOR Spareforsikring's first-half result after a preliminary allocation to policyholders and tax came to NOK 113 million. This compares with a negative result of NOK 103 million in 2002. Undistributed profit rose from a negative NOK 1,475 million in the first half of 2002 to NOK 942 million in the current year. The preliminary allocation to policyholders over and above guaranteed return amounted to NOK 822 million. Unrealised gains worth NOK 900 million were built up in the first half-year.

The improved profit performance is primarily due to a positive trend in financial markets, while the financial strategy also renders results less exposed to market fluctuations. Net financial income totalled NOK 2,312 million in the first half of the current year compared with a negative NOK 245 million last year. This produced a first-half book return of 3.6 per cent, with value-adjusted return at 5 per cent. With unrealised gains on assets held to maturity included, value-adjusted return for the first half-year came to 6 per cent.

Premiums due for the first half-year were on a par with last year at NOK 2,327 million. Although, at NOK 293 million, first-half operating expenses were somewhat higher than the NOK 289 million recorded in 2002, in terms of policyholder assets they improved from 1.01 per cent to 0.94 per cent.

The market for group pensions showed high activity in the first half-year, and Gjensidige NOR Spareforsikring's creditable sales results continued. Interest in defined-contribution plans is growing. Sales of retail market products offering guaranteed returns were somewhat weaker than expected, while sales of unit-linked products picked up somewhat.

First-quarter market statistics for Norwegian life companies show that Gjensidige NOR Spareforsikring ASA retained its end-2002 market shares in both the retail and business segments.

The company's assets under management rose in the first half of 2003 by almost NOK 3.2 billion, or 4.8 per cent, to NOK 69.3 billion. Buffer capital was strengthened by sound financial returns, and as of end-June the company's risk capital totalled almost NOK 3.3 billion

in terms of the solvency margin requirements. At the same point the solvency margin ratio stood at 152.6 per cent and the capital adequacy ratio at 15.5 per cent.

Norwegian shares and bonds produced particularly good returns of 15.8 per cent and 9.4 per cent respectively in the first half-year. Other asset classes also performed satisfactorily. The real estate market has in general been sluggish in the past couple of years, but close scrutiny of the company's portfolio shows that there is no basis for revising the values underlying the annual report and accounts for 2002.

Gjensidige NOR Spareforsikring will continue a financial strategy entailing substantial allocations to asset classes that provide good earnings flows.

OUTLOOK

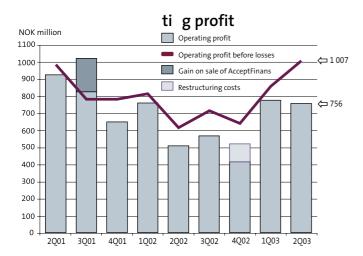

The Board of Directors expects the authorities to complete their consideration of the application to merge Gjensidige NOR ASA and DnB Holding ASA in the course of the fourth quarter. Assuming that the requisite authorisations are given, the Board also expects settlement to Gjensidige NOR's shareholders in the form of shares in DnB NOR and cash payments to take place in the fourth quarter.

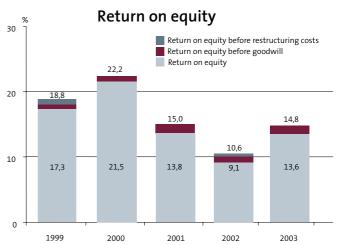

The outlook for the Norwegian economy remains uncertain. The krone exchange rate and interest rates have fallen substantially over the past half-year. Positive signals in Norway and the international arena of late indicate some improvement in the economic situation. Even so, losses and defaults in the business market can be expected to be somewhat higher than in previous years.

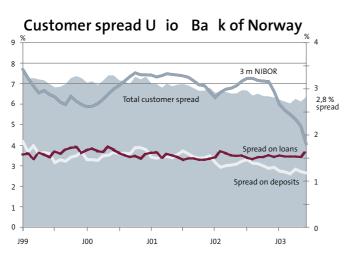

Norwegian households account for more than half of Gjensidige NOR's total lending. Losses and defaults in this customer segment remain at a low level and are not anticipated to rise significantly. While rising unemployment is bringing the debt-servicing ability of parts of the customer base under pressure, low interest rates are helping to reduce the financial consequences of higher unemployment. Net losses measured 0.30 per cent of overall loans in the first half-year. Normalised losses at the end of 2002 were estimated at 0.48 per cent. Although losses are expected to exceed the full-2002 figure of 0.26 per cent, the Board still expects losses to be well below the estimated normalised level, and it foresees a satisfactory profit performance for the year as a whole.

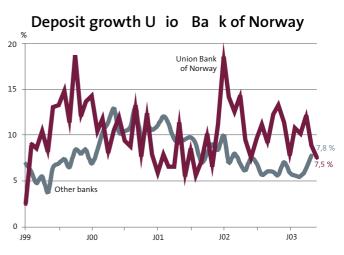

Oslo, 12 August 2003

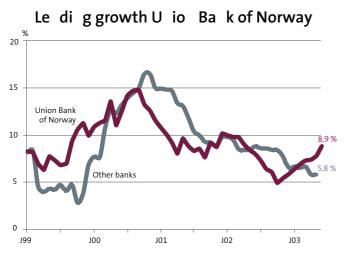

The Board of Directors of Gjensidige NOR ASA

^(**) Measured against same quarter last year.

(**) Until third quarter 2002 Primary Capital Certificates were Union Bank of Norway's equity instrument.

 $[\]mbox{(1)} \qquad \mbox{Ratio of operating expenses to operating income}.$

After-tax operating profit in % of quarterly reported average equity (incl. minority interests).

⁽³⁾ Dividend paid plus change in market price from 1 Jan to end of period, in % of market price on 1 Jan.

Customer deposits in % of gross loans to customers at end of quarter.

Notes

1 ACCOUNTING POLICY - CREATION OF THE GROUP

The consolidated accounts for Gjensidige NOR ASA include Union Bank of Norway ASA, Gjensidige NOR Spareforsikring ASA and Gjensidige NOR Fondsforsikring AS with subsidiaries and associated companies. The accounts for the Gjensidige NOR ASA Group have been compiled in accordance with the policy described in the annual accounts for 2002.

All amounts are shown in NOK million.

Solvency margin in % of requirements (**) (*) Quarterly figures have been annualised.	152.6 %	131.4 %			153.3 %

^(**) Quarterly figures have been annualised.

(**) The solvency margin requirement is an expression of risks attached to technical commitments (interest guarantee and death/disability), and is computed on the basis of the size of the life insurance fund and the sum of risk insurance premiums. The solvency margin capital includes the eligible capital base, 50% of supplementary reserves and that part of the contingency reserve that exceeds 55% of the minimum required contingency reserve. Total solvency margin capital must at a minimum cover the solvency margin requirement.

The company presented its first interim financial statement as of 30 September 2002.

(1) Merger expenses

In connection with the proposed merger with Den norske Bank, irreversible accrued expenses amounting to NOK 30 million on financial advisers have been expensed. If the merger is carried out, total costs on financial advisers and translation, printing and distribution of the prospectus and other relevant information to Gjensidige NOR's shareholders are expected to amount to NOK 114-150 million, depending on the size of discretionary additional fees to financial advisers. The remaing costs on financial advisers will largely be expensed once final approval has been given to carry out the merger.
