

Annual report

2006

# 2006 in brief

	2006	2005
Pre-tax operating profits before write-downs (NOK million)	11 917	10 140
Profits for the year (NOK million)	8 872	7 327
Total assets at year-end (NOK billion)	1 103	860
Return on equity (per cent)	18.2	18.7

## First quarter 2006

- Operations in DnB NOR and Monchebank became part of the DnB NOR Bank Group

## Second quarter 2006

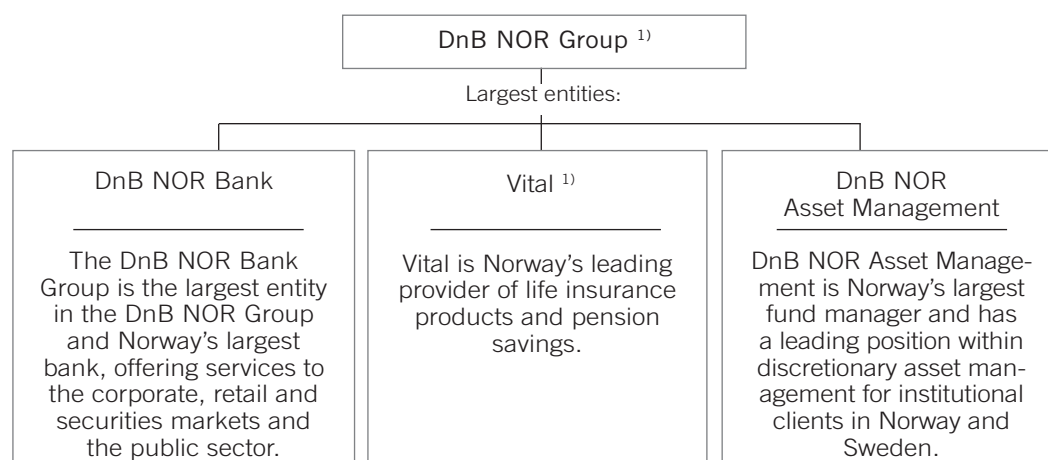

- A successful coordination of the account systems in the former DnB and Gjensidige NOR was completed
- The integration was concluded and the synergy targets were reached ahead of schedule
- DnB NOR Finans established new operations in the Swedish market
- The Board of Directors approved a new capitalisation policy for DnB NOR
- The general meeting renewed the authorisation of the Board of Directors of DnB NOR ASA to acquire the Group's own shares for a total nominal value corresponding to 10 per cent of share capital
- The Group applied for permission to use the advanced IRB approach for credit risk as from 1 January 2008 in connection with Basel II, the new capital adequacy rules
- The Board of Directors of DnB NOR ASA appointed Rune Bjerke as new group chief executive, succeeding Svein Aaser, who retired on 31 December 2006

## Third quarter 2006

- DnB NOR Bank established Postbanken Eiendom
- DnB NOR Bank opened a full-service corporate branch in Shanghai
- Dominion Bond Rating Service, the Canadian rating agency, assigned a long-term rating of AA to DnB NOR Bank ASA
- DnB NOR Bank was presented with the annual Lloyd's Shipping Award for its syndicated lending to the shipping industry

## Fourth quarter 2006

- DnB NOR Bank launched a USD 2 million three-year bond issue in the US, the first issue in a funding programme for the issue of bonds in the US market
- DnB NOR Bank entered into an agreement to buy 76.3 per cent of BISE Bank in Poland through its partly-owned subsidiary DnB NORD
- The Group received preliminary approval from Kredittilsynet (the Financial Supervisory Authority of Norway) to use the foundation IRB approach for credit risk from 1 January 2007
- DnB NOR established a life phase programme for the Group's employees intended to motivate senior employees to work longer

1) Separate annual and quarterly reports are prepared for the DnB NOR Group and Vital.

# Directors' report 2006 – DnB NOR Bank ASA

*In accordance with the provisions of the Norwegian Accounting Act, the Board of Directors confirms that the accounts have been prepared on a going concern basis.*

*DnB NOR Bank ASA and the banks' subsidiaries prepare consolidated annual accounts in accordance with Norwegian accounting legislation and generally accepted accounting principles. The principles applied are described under accounting principles.*

## Operations in 2006

The DnB NOR Bank Group <sup>1)</sup> showed a healthy financial performance in 2006. All of the banking group's business areas recorded strong profits and brisk growth in both domestic and international operations. In spite of fierce competition, banking group income increased by 15.1 per cent in 2006 compared with 2005, while ordinary operating expenses were up 12.9 per cent. The cost trend in 2006 reflected the banking group's extensive investments in new international operations, product development and new IT systems.

The rise in income reflected a boost in lending volumes, brisk sales of savings and pension products and the expansion of international operations. Low risk in loan portfolios resulted in very low write-downs on loans and guarantees for the banking group in 2006.

Group chief executive Svein Aaser retired on 31 December 2006, and Rune Bjerke assumed the position as new group chief executive for DnB NOR on 1 January 2007.

The plan for the merger between DnB and Gjensidige NOR included staff cuts of 1 425 full-time positions and cost synergies of NOK 1 600 million, with full effect as from 2007. The integration process was largely completed in 2006, and the synergy targets were reached ahead of schedule. During Easter 2006, the banking group carried out a highly successful integration of the

account systems of the former DnB and Gjensidige NOR, which was the final technical integration project in connection with the merger.

The banking group is well equipped for further expansion in Norway and in selected areas and industries internationally. The banking group has a strong position in all corporate market segments in Norway and strengthened its market shares in 2006 through healthy lending growth. With a 37 per cent market share at the end of 2006, DnB NOR Bank is the leading bank for small and medium-sized companies in Norway.

DnB NOR Bank is one of the world's leading banks within ship finance, with a portfolio of just under NOK 100 billion. In September 2006, the banking group opened a full-service branch in Shanghai and thus became the first foreign financial institution in China to focus on ship finance. In the third quarter of 2006, DnB NOR Bank won the year's Lloyd's Shipping Economist Award for its syndicated lending to the shipping market.

The banking group's international operations were further expanded in 2006. In December, DnB NOR Bank entered into an agreement to acquire 76.3 per cent of the Polish BISE Bank through its partially owned subsidiary DnB NORD, resulting in a twofold increase in DnB NORD's operations in Poland. DnB NORD was established in 2005. In addition to Poland, the bank has operations in Finland, Estonia, Latvia, Lithuania and Denmark. DnB NOR Bank owns 51 per cent of DnB NORD, while Norddeutsche Landesbank owns the remaining shares. DnB NOR Monchebank became part of the banking group in 2006. The bank has given the banking group an important foothold in Northwest Russia.

The banking group serves more than two million customers in the retail market. Through its extensive branch network, the business area Retail Banking represents a broad distribution

---

<sup>1)</sup> DnB NOR Bank ASA is a subsidiary of DnB NOR ASA and part of the DnB NOR Group. The DnB NOR Bank Group, hereinafter called "the banking group", comprises the bank and the bank's subsidiaries. Other companies owned by DnB NOR ASA, including Vital Forsikring and DnB NOR Kapitalforvaltning, are not part of the banking group. Operations in DnB NOR ASA and the total DnB NOR Group are not covered in this report but described in a separate annual report.

channel. The banking group was among the pioneers launching mobile phone banking and real estate broking services. There was considerable growth in the use of web-based solutions in 2006. Retail Banking recorded a strong increase in the sale of customer loyalty programmes during the year. DnB NOR Bank established Postbanken Eiendom during the third quarter of 2006 and plans to offer real estate brokerage services in all of Postbanken's 41 customer service centres.

In the fourth quarter of 2006, DnB NOR Bank's wholly-owned subsidiary DnB NOR Hypotek was merged into the bank. The purpose of the merger was to strengthen marketing initiatives relating to commercial property financing by bringing together expertise in this field in DnB NOR Bank.

All activities in DnB NOR Markets experienced strong growth and higher income in 2006. Again in 2006, DnB NOR Markets was the largest brokerage house on Oslo Børs within equities, bonds and commercial paper.

To make DnB NOR an even more attractive workplace, the Group established a life phase programme in 2006. The programme includes measures to motivate senior employees to work longer instead of opting for early retirement. The programme also includes measures targeting young employees.

In 2006, the Canadian rating agency Dominion Bond Rating Service assigned a long-term rating of AA to DnB NOR Bank ASA, which was a recognition of the successful merger. DnB NOR Bank ASA was upgraded to a long-term rating of Aaa by Moody's in February 2007. DnB NOR Bank ASA already has an A+ rating from Standard & Poor's.

New capital adequacy regulations (Basel II) entered into force as from 2007. On 30 September 2005, the DnB NOR Group sent an application to Kredittilsynet (the Financial Supervisory Authority of Norway) for permission to use the IRB foundation approach (Internal Ratings Based) for credit risk as from 1 January 2007. Kredittilsynet has granted such permission. In June 2006, the Group applied for permission to use the IRB advanced approach for credit risk as from 1 January 2008. The banking group's adaptation to the new capital adequacy regulations is on schedule. Consequently, limitations in transitional rules will determine the impact on risk-weighted volume over the next few years. Primary capital must be minimum 95 per cent of the capital requirement according to previous rules in 2007, 90 per cent in 2008 and 80 per cent in 2009.

The core capital ratio for the banking group was 6.8 per cent as at 31 December 2006. The Board of Directors considers the banking group to be well capitalised relative to the risk level of the loan portfolios and other operations.

During the year, the Board of Directors held 34 meetings. Important measures on the agenda were the banking group's future development, strategies and structure, the Basel II application and the appointment of a new chief executive. The Audit Committee, which also functions as the bank's Audit Committee, held five meetings in 2006. The committee reviewed the quarterly and annual accounts, risk reporting and the work of the internal and statutory auditors.

The Board wishes to thank all of the banking group's employees for their great efforts and high work ethics during a demanding year characterised by considerable market challenges and opportunities as well as extensive integration processes.

## Strategy

DnB NOR has the largest customer base in the Norwegian

financial market and is a leader in most market segments. This market position provides a sound basis for generating further growth by developing and strengthening customer relationships. The business idea reflects DnB NOR's ambitions:

"DnB NOR will be customers' best financial partner and will meet their needs for financial solutions. DnB NOR's strengths are proximity to customers and a full range of services."

Improved advisory services, decision-making as close as possible to the customer and a product range well-adapted to meet individual customer needs are important aspects of the strategy. DnB NOR's various business areas work in close cooperation to offer customers good financial solutions at all times, bringing convenience to their everyday lives.

In addition to maintaining its strong position in Norway, the Group aspires to expand its presence in international markets and increase the share of income from international operations. The Group's international growth will be based on comparative advantages in the form of either competence within various customer segments and industries, special product expertise or established relationships where it is logical to accompany customers expanding outside Norway. DnB NOR is the preferred partner for international customers doing business in Norway.

A common value base and culture are prerequisites for creating a uniform DnB NOR image in the market. The Group's shared values, team spirit, simplicity and value creation, describe what should distinguish the organisation and work processes both internally and in relation to customers. Both internal and external communication should be open, honest and easy to understand.

The financial targets reflect the aim to create shareholder value. The Group seeks to achieve a return on equity and share price increases that are competitive in a Nordic context. The specific long-term targets are:

- Return on equity should be above 15 per cent.
- The cost/income ratio should be below 50 per cent by 2008.
- In the longer term, the Group's equity will be structured to ensure that core capital excluding hybrid securities exceeds the minimum requirement, with the addition of a capital buffer that is determined based on the Group's model for calculating risk-adjusted capital requirements. The Group's capitalisation target corresponds to a core capital ratio of around 6.5 per cent.
- Approximately 50 per cent of annual profits should be distributed as dividends, provided that capital adequacy remains at a satisfactory level.
- DnB NOR Bank ASA's ratings for ordinary long-term debt should at least be Aa level.

## Review of the annual accounts

### Full year results 2006

The DnB NOR Bank Group recorded pre-tax operating profits before write-downs of NOK 11 917 million in 2006, up NOK 1 777 million or 17.5 per cent compared with 2005. Profits for the year totalled NOK 8 872 million in 2006, an increase of NOK 1 545 million or 21.1 per cent from the previous year. Return on equity was 18.2 per cent in 2006, down from 18.6 per cent in 2005. Due to strong profits in both 2005 and 2006, return on equity exceeded the banking group's long-term target. The ratio of ordinary operating expenses to income was 51.6 per cent in 2006 and 52.5 per cent in 2005.

## Income

The banking group's income totalled NOK 24 900 million in 2006, an increase of NOK 3 258 million or 15.1 per cent from 2005.

### Net interest income

Net interest income was NOK 15 844 million in 2006, a rise of NOK 2 443 million or 18.2 per cent compared with 2005.

Sound lending and deposit growth in 2006 gave an increase in interest income which more than compensated for narrower spreads. Due to strong competition, the combined spread contracted by 0.07 percentage points in 2006 and was 2.02 per cent in the fourth quarter of the year.

The table below specifies changes from 2005 according to main items:

#### Changes in net interest income

<i>Amounts in NOK million</i>	2006	Change	2005
Net interest income	15 844	2 443	13 401
DnB NORD	757	757	
DnB NOR Monchebank	30	30	
Net interest income, adjusted		1 656	
Lending and deposit volumes		1 697	
Lending and deposit spreads		(954)	
Non-interest earning items including equity		593	
Installment fees, standby fees etc.		104	
Other		216	

### Net other operating income

Net other operating income totalled NOK 9 056 million in 2006, up NOK 815 million or 9.9 per cent from 2005. The increase reflected a rise in brokerage fees and credit broking income, brisk sales of savings and pension products, high income from the banking group's corporate finance activity and gains from the sale of fixed assets. The gains were mainly attributable to the sale of bank buildings. Lower gains on foreign exchange and financial instruments can be explained by the realisation of gains on the sale of Storebrand shares in 2005.

Net other operating income represented 36.4 per cent of total income in 2006 compared with 38.1 per cent in 2005.

The table below specifies changes from 2005 according to main items:

#### Changes in net other operating income

<i>Amounts in NOK million</i>	2006	Change	2005
Net other operating income	9 056	815	8 241
DnB NORD	320	320	
DnB NOR Monchebank	21	21	
Net other operating income, adjusted		473	
Net commissions and fees		345	
Net gains on foreign exchange and financial instruments		(119)	
Net gains on the sale of fixed assets		234	
Other income		13	

### Operating expenses

The Banking group's ordinary operating expenses totalled NOK 12 837 million in 2006, an increase of NOK 1 470 million from 2005. Excluding operations in DnB NORD and DnB NOR Monchebank, expenses rose by NOK 707 million or 6.2 per cent.

The cost trend in 2006 reflected rising personnel expenses due to higher pension costs, performance-based pay and the result of the annual wage settlements. In 2005, pension expenses were particularly low due to the one-off effect of the restructuring of the pension scheme. 2006 was a period of investment, product development and international start-ups for the banking group. The investments will ensure a broader income base and lay a more solid platform for future income growth.

In 2006, the banking group recorded systems development expenses totalling NOK 218 million in the balance sheet, a rise from NOK 119 million in 2005. The balance sheet value of IT systems developed in-house and purchased by the banking group is assessed relative to the discounted value of future cash flows. These calculations did not result in any significant write-downs in 2006 or 2005.

The table below shows changes from 2005 according to main items:

#### Changes in ordinary expenses

<i>Amounts in NOK million</i>	2006	Change	2005
Ordinary operating expenses	12 837	1 470	11 367
DnB NORD	729	729	
DnB NOR Monchebank	34	34	
Ordinary operating expenses, adjusted		707	
Pension expenses		399	
Wage settlements		145	
Performance-based pay		254	
IT development		153	
Synergies		(325)	
Other		81	

### Net gains on longterm investments in securities

Net gains on longterm investments in securities amounted to NOK 3 million in 2006 compared with NOK 203 million in 2005. The gains in 2005 was mainly attributable to the realisation of equity positions in Brazil.

### Write-downs on commitments

Due to strong earnings in the business sector and healthy finances among Norwegian households, the banking group recorded low write-downs on loans in 2006. Net reversals on write-downs on loans and guarantees came to NOK 243 million. Individual write-downs totalled NOK 160 million and group write-downs were reduced by NOK 403 million, reflecting the positive trend in the Norwegian economy. The corresponding figure for 2005 was NOK 42 million in net reversals on write-downs, all of which represented individual write-downs.

After deductions for individual write-downs, net non-performing and impaired commitments came to NOK 3 800 million at end-December 2006, a decline of NOK 1 440 million from 2005. Net non-performing and impaired commitments represented 0.45 per cent of net lending at year-end 2006, down from 0.75 per cent a year earlier. The reduction reflected sound risk management and the healthy financial trend in the business community and among retail customers.

### Taxes

The banking group's total tax charge for 2006 was NOK 3 292 million, representing 27.1 per cent of pre-tax operating profits. In 2005 the tax charge was NOK 3 058 million or 29.4 per cent of pre-tax operating profits. The banking group anticipates a future

normalised tax level of 27 per cent.

### Balance sheet

Total assets in the banking group's balance sheet were NOK 1 103 billion at year-end 2006, as against NOK 860 billion a year earlier.

Net lending to customers rose by NOK 132 billion or 19 per cent during the twelve-month period.

Customer deposits rose by NOK 63 billion or 15 per cent from 2005.

In order to keep the banking group's liquidity risk at a low level, the majority of loans are financed through customer deposits, long-term securities, subordinated loan capital and equity. With respect to short-term funding of the bank, restrictive borrowing limits have been established. The banking group has good access to the European, Asian and US capital markets. The ratio of customer deposits to net lending to customers was maintained at a satisfactory level, standing at 58.3 per cent at end-December 2006, down from 60.4 per cent a year earlier. The Board of Directors considers the banking group's liquidity situation to be sound.

Securities issued by the banking group increased by NOK 115 billion or 48.7 per cent from 2005, totalling NOK 352 billion at end-December 2006. The majority of the securities were issued in international capital markets, and there was a significant increase in the banking group's funding in the US capital market in 2006. In October, DnB NOR Bank launched a bond issue of USD 2 billion with a three-year maturity. The issue was very well received in the US market and helped expand the bank's investor base.

### Risk and capital adequacy

The management of the banking group is based on the principles contained in the Norwegian Code of Practice for Corporate Governance. There are no significant deviations between the Code of Practice and the way it is implemented in the banking group. With respect to the special needs of financial institutions, where management of financial risk is part of core activities, the banking group also takes account of recommendations from the Committee of European Banking Supervisors, CEBS. The Board of Directors annually reviews the banking group's key risk areas and internal control.

The banking group quantifies risk by measuring risk-adjusted capital. Net risk-adjusted capital requirements increased by NOK 6.4 billion to NOK 39.7 billion at year-end 2006. The increase reflected higher credit volumes.

The table below shows developments in the risk-adjusted capital requirement:

<i>Amounts in NOK billion</i>	31 Dec. 2006	31 Dec. 2005
Credit risk	36.0	31.1
Market risk	2.4	1.9
Operational risk	4.0	3.6
Business risk	2.1	1.4
Gross risk-adjusted capital	44.6	38.0
Diversification effect <sup>1)</sup>	(4.9)	(4.7)
Net risk-adjusted capital	39.7	33.3
Diversification effect in per cent of gross risk-adjusted capital <sup>1)</sup>	11.0	12.3

1) *The diversification effect refers to the effect achieved by the banking group in reducing risk by operating within several risk categories where unexpected losses are unlikely to occur at the same time.*

There was brisk credit growth in both the retail and corporate markets in 2006. Growth was particularly strong within shipping and offshore, and the banking group syndicated large volumes to other financial institutions. The banking group is a major international syndication arranger in these sectors. Acquisition financing was another growth area in 2006, reflecting the strong dynamics in the corporate sector. Sound corporate earnings, rising housing prices and falling unemployment rates were additional factors in improving portfolio quality in 2006.

The rise in market risk for the banking group mainly reflected a favourable price trend for equity investments. Limits for equity positions in DnB NOR Markets were increased somewhat in 2006, though income from customer business accounted for a rising share of profits.

The successful integration of the account systems of the former DnB and Gjensidige NOR during Easter 2006 had a positive effect on the banking group's operational risk. There was also a reduction in operational disturbances in the banking group's IT systems in 2006. The banking group recorded no major operational losses in 2006.

Risk-weighted volume included in the calculation of the capital adequacy requirement was NOK 787.3 billion at end-December 2006, up 23.8 per cent from 2005. The core capital ratio was 6.8 per cent, compared with 7.7 per cent in 2005, while the capital adequacy ratio was 10.2 per cent at year-end 2006.

### Corporate social responsibility

Due to DnB NOR's role in society, its responsibilities go beyond the management of financial values. It is strategically important for the Group to create a basis for sustainable economic growth. Profitability should be combined with environmental and social considerations.

The manner in which corporate social responsibility is exercised by the Group is a key factor in maintaining the trust of customers, shareholders, employees and society at large. DnB NOR's corporate social responsibility ambitions are outlined in a special policy. The most important elements are:

- DnB NOR wishes to promote sustainable development through responsible business operations giving priority to environmental, ethical and social considerations.
- DnB NOR will not be involved in activities representing a risk of involvement in unethical conduct, infringement of human or labour rights, corruption or harm to the environment.
- DnB NOR aspires to be among the best financial institutions in the Nordic region within corporate social responsibility.

DnB NOR's corporate social responsibility policy is based on the Group's strategy, corporate culture and values, as well as on internationally recognised principles and guidelines. DnB NOR has, among other things, endorsed the principles of the United Nations Global Compact, OECD's guidelines for international companies and the Transparency International anti-corruption principles. In 2006, DnB NOR's Board of Directors approved a new code of ethics to increase awareness of and ensure compliance with the Group's governing ethical standards.

In 2006, corporate social responsibility guidelines for credit operations were revised. In addition, guidelines for socially responsible equity investments were established. The guidelines imply that all credit evaluations and investments are based on ethical, environmental and social criteria.

Special declaration forms for the Group's external suppliers were introduced with effect from 1 January 2006. Suppliers must sign a declaration confirming that they neither contribute to the violation of human or labour rights, nor engage in environmental harm or corruption. Only suppliers that sign the declaration will be considered in connection with the signing of new contracts and the renegotiation of current contracts. Suppliers have responded positively to the special declaration.

DnB NOR's contribution to sustainable development also means being a good partner for cultural activities, sports and humanitarian organisations. The Group supports a number of humanitarian organisations and in 2006 was a general sponsor of Plan Norway and the Nobel Peace Centre. NOK 71 million was paid to sports, cultural activities, humanitarian organisations and as donations to good causes in 2006.

Sparebankstiftelsen DnB NOR (the Savings Bank Foundation), which has a major ownership interest in DnB NOR, gives financial contributions to a wide range of charitable causes. In 2006, the Foundation made donations totalling NOK 80 million.

## Employees and managers

Earning the trust of the surrounding community and obtaining lasting commercial success is dependent on each individual employee maintaining high ethical standards. The Group's code of ethics applies to all employees and members of governing bodies, comprising aspects such as customer and supplier relationships, duty of confidentiality, impartiality, gifts and services, trading in financial instruments and insider trading. Training and courses in handling ethical dilemmas are important instruments in making ethics an integrated part of the Group's daily operations. In 2006, the first financial advisors in Retail Banking were certified. All employees who are primarily engaged in advising retail customers shall be certified.

DnB NOR is strongly committed to being an attractive workplace. The Group's human resources policy should ensure diversity and equality, the necessary restructuring measures, competence development, sound health, safety and environmental standards, and good relations with the employee organisations. DnB NOR offers attractive trainee programs, and there are many applicants to the positions offered.

The survey carried out in January 2007 showed that employee satisfaction was up 4.7 points to 72.6 on a scale from 0-100. This survey is one of the tools helping the banking group implement systematic, targeted measures. In addition, special focus areas are selected both at group level and in operative units to improve employee satisfaction.

Competent leadership and the training of good managers are of strategic importance to the banking group. In 2006, 151 managers completed the "Practical management training" programme based on the values team spirit, simplicity and value creation. The programme aims to promote relationship building and networking among managers in the Group. Moreover, approximately 1 000 managers participated in development processes in their respective management teams. The purpose of management training activities in the banking group is to develop a common corporate culture and establish good working methods in the individual units and throughout the Group. Several custom-made management training programmes to suit the specific needs of each business area were also implemented.

## External environment

DnB NOR influences the external environment directly and indirectly. The Group's investments and lending activities have an indirect impact on the environment and are governed by corporate social responsibility guidelines for credit operations. DnB NOR has a direct impact on the environment through its consumption of paper and energy, waste management, procurement and use of means of transport.

DnB NOR wishes to reduce the Group's direct environmental impact by keeping its own house in order. Measures implemented include certifying most large buildings under the eco-lighthouse programme. In 2005, a special declaration was introduced regarding suppliers' corporate social responsibility in connection with procurements; see description in the section on corporate social responsibility above. As part of environmental efforts, DnB NOR has drawn up an environmental action plan containing specific targets for energy and paper consumption, waste management, procurements and environmental certification of properties in the period 2006–2008.

### Environmental order in our own house – key figures <sup>1)</sup>

	Targets for 2006	Results 2006	Targets for 2007	Measures to reach the targets for 2007
Energy consumption	3.5 per cent reduction	19 per cent reduction	Unchanged	
Waste recycling ratio	60 per cent	59.5 per cent	Unchanged	
Paper consumption	2.5 per cent reduction in purchased paper	Increase of 4.3 per cent in purchased paper	2.5 per cent reduction in purchased paper	Install double-sided print as standard option for all printers and increase use of electronic communication.
Domestic air travel	Zero increase in number of air kilometres	16.6 per cent reduction		
International air travel	Maximum increase of 30 per cent	39.7 per cent increase		Increase use of telephone and video conferences as a replacement for physical meetings.
Eco-lighthouse certification	A total of 15 certified buildings	A total of 15 certified buildings	Certification of five new buildings	

1) These figures do not include Nordlandsbanken, DnB NOR Monchebank and DnB NOR. Nordlandsbanken has the same targets for 2007 as the rest of the banking group. DnB NOR Monchebank's target for 2007 is to have no increase in its energy consumption. DnB NOR Monchebank and DnB NOR participate in general environmental improvement programmes in those countries where they are represented.

## Health, safety and environment (HS&E)

As part of the Group's systematic and long-term HS&E work, DnB NOR will promote and facilitate physical and cultural activity among its employees. Several thousand DnB NOR employees participate in company sports activities and different cultural groups. Physical training during working hours is offered to units where sedentary work may cause muscular tension. The figures below do not include operations in DnB NOR and DnB NOR Monchebank. No occupational injuries were reported in DnB NOR Monchebank in 2006, and in the course of 2007, HS&E and working environment training programmes will be launched. In the course of 2007, DnB NOR will draw up a joint HS&E strategy for operations, including measures to reduce sickness absence.

### Open-plan office solutions

Many employees were relocated in 2006, and the introduction of more open-plan offices changed working methods. The relocations have presented great challenges with respect to planning and involvement of employees. In addition to ergonomic adjustments of work stations, great emphasis has been placed on noise screening measures to ensure a working environment with optimal communication and knowledge-transfer opportunities.

### Sickness absence

Sickness absence in the banking group averaged 5.51 per cent in 2006, in comparison with 5.15 per cent in 2005. Sickness absence in DnB NOR Monchebank was 1.24 per cent in 2006. Priority is given to implementing preventive measures and to giving additional assistance to those units with high levels of sickness absence.

### An inclusive workplace

As an inclusive workplace, DnB NOR is committed to closely following up employees absent due to illness and to reducing, as far as possible, such periods of absence. Professional support in this area is provided by external occupational health services. Furthermore, DnB NOR seeks to adapt working hours to suit the different life phases and working situations of the employees.

### HS&E and working environment training

DnB NOR endeavours to prevent injuries caused by robberies and threats through extensive security procedures and training programmes. In 2006, 31 managers and 48 safety representatives completed the banking group's internal HS&E and working environment training programme, covering such topics as security and emergency preparedness.

### Occupational injuries

In 2006, a total of 31 occupational injuries were reported, of whom seven employees were exposed to threats, but no employees suffered injuries due to robberies. The other reported occupational injuries were minor or moderate.

A security and aftercare training programme has been launched, targeting branch office staff. The programme can be adapted to other target groups in the banking group and consists of a three-hour course, taught by in-house experts.

- Courses and drills in coping with bank robberies: 465
- Threat management training courses: 37
- Security courses: 209
- Disaster recovery exercises: 75

## Equality

DnB NOR is committed to equality between men and women in the Group. Measures are implemented to ensure that men and women are given the same opportunities for professional and personal development, career progression, salary levels and other benefits. DnB NOR also has flexible schemes that make it easier to combine a career with family life. At year-end 2006, the gender balance in the banking group was 55 per cent women and 45 per cent men.

DnB NOR seeks greater diversity in its management teams. The target set by the Board of Directors for equality at the four top management levels in the Group calls for a minimum of 25 per cent women by the end of 2006 and minimum 30 per cent by the end of 2009. At the end of 2006, the proportion of women in the management teams at the four top levels was 25 per cent. If figures for management level five are included, the total female representation was 31 per cent. DnB NOR Monchebank and DnB NOR are not included in these figures. DnB NOR Monchebank has 67 per cent women in its two upper management levels. During 2007, DnB NOR will draw up targets for its equal opportunity strategy. At year-end 2006, DnB NOR had 20 per cent women at management level two and in the course of 2007 targets and measures will be determined to increase the number of women managers..

### Crescendo

In 2006, an in-house talent development programme for women was started in DnB NOR, called Crescendo. Ten women were selected to develop their management skills. Upon completion of the programme they will be well equipped to take on responsibilities at senior management level. Each participant has been matched with a partner selected among current senior group managers. The programme has a duration of 18 months and is part of DnB NOR's strategy to increase the number of women managers in DnB NOR.

### Other equal opportunity measures in DnB NOR:

- Priority to be given to female applicants for management positions, subject to equal qualifications.
- The best female candidate to be considered for positions in units where women are in a minority.
- Equality and diversity to be on the agenda in management training programmes.
- All vacancies to be advertised internally.

## Future prospects

The economic climate in Norway was very favourable in 2006. A high level of optimism and low interest rate levels encouraged healthy growth in corporate investments and high credit demand. The demand for housing loans remained at a very high level throughout 2006 despite a gradual rise in interest rate levels.

Continued growth is expected in the Norwegian economy during 2007, despite the warning from Norges Bank that it will tighten its monetary policy. A high level of optimism, healthy income growth and sound corporate and household finances will help maintain good, but somewhat lower future lending growth. Sizeable corporate profits ensured a strong rise in deposits in 2006. The growth is anticipated to be somewhat subdued in 2007. Rising interest rate levels and real wage growth for Norwegian households are expected to lead to an increase in savings and deposits in 2007.

The banking group is determined to exploit in full its size and broad range of products and services. Moreover, productivity and cost awareness will be improved at all levels.

Competition in the housing loan market is expected to become more intense in future, as is competition in the credit card market and within consumer financing. With its wide range of products, extensive distribution network and competence, the banking group is well-equipped to meet the intensifying competition. The banking group aims to enhance customer satisfaction in 2007 and to maintain or increase its market shares in Norway.

The banking group expects robust and targeted international growth in 2007. Operations in Sweden and in DnB NOR will be further strengthened over the next few years. The acquisition of BISE Bank in Poland is part of this expansion. DnB NOR Monchebank has given the banking group an important foothold in North-West Russia, which is an area with sound economic growth. The opening of a branch in China was an important element in DnB NOR Bank's strategy to consolidate its position as one of the world's leading ship finance banks. The banking group's international operations will represent an increasing share of profit growth in 2007.

## Dividends and allocation profits

Profits for 2006 in DnB NOR Bank ASA came to NOK 9 659 million. The Board of Directors proposes a group contribution of NOK 7 700 million from DnB NOR Bank ASA to DnB NOR ASA. After taxes the group contribution amounts to NOK 5 544 million.

The banking group's capital adequacy ratio as at 31 December 2006 was 10.2 per cent, with a core capital ratio of 6.8 per cent. Correspondingly, capital adequacy in DnB NOR Bank ASA was 10.6 per cent and core capital 7.1 per cent.

In the opinion of the Board of Directors, following allocations, DnB NOR Bank ASA will have adequate financial strength and flexibility to cover the bank's financial risk, provide satisfactory support to operations in subsidiaries and meet the banking group's expansion requirements.

In connection with the finalisation of the annual accounts, the Board of Directors decided to allocate NOK 14 750 to each employee. The total allocation including employers contribution amounted to NOK 146 million. Importance has been placed on expressing appreciation for the excellent work carried out by the staff during a challenging year for all and for the good results that were achieved.

The cash flow statement shows receipts and payments of cash and cash equivalents during the year. The statement has been prepared in accordance with the direct method and has been adjusted for items that do not generate cash flows, such as depreciation and write-downs on loans and guarantees. Cash flows are classified as operating activities, investment activities or funding activities. Balance sheet items are adjusted for the effects of exchange rate movements. Cash is defined as cash and deposits with central banks, and deposits with credit institutions with no agreed period of notice.

1) A significant share of the Group's operations was during 2005 and 2006 funded by issuing bonds and commercial paper.

## Note 1 Accounting principles etc.

The accounts of DnB NOR Bank and the bank including subsidiaries, the banking group, are based on Norwegian accounting legislation, the accounting regulations issued by the Ministry of Finance and Norwegian generally accepted accounting principles. For the time being, it is not permissible for unlisted Norwegian banks to prepare the accounts according to IFRS.

### CHANGES IN ACCOUNTING PRINCIPLES

The effects of changes in accounting principles are recorded directly against equity.

DnB NOR Bank implemented regulations from the Ministry of Finance on the accounting treatment of loans and guarantees in the accounts of DnB NOR Bank and the banking group effective 1 January 2006.

### COMPARABLE FIGURES

Figures for previous periods have not been restated, but reclassified in accordance with the new presentation format.

Comparable figures have not been restated following the establishment of DnB NOR and the acquisition of Monchebank.

### CONSOLIDATION

The consolidated accounts of DnB NOR Bank ASA ("DnB NOR Bank" or "the banking group") include DnB NOR Bank ASA, subsidiaries and associated companies. Subsidiaries are defined as companies in which DnB NOR Bank has control, directly or indirectly, through a long-term ownership interest and a holding of more than 50 per cent of the voting share capital or primary capital and a decisive influence on the company's operations. Subsidiaries are consolidated from the time DnB NOR Bank takes over control of the company, including financial risk.

In the accounts of DnB NOR Bank ASA, investments in subsidiaries are recorded at cost.

Associated companies in which the banking group has a long-term holding of between 20 and 50 per cent and a significant influence on operations, are carried in the group accounts according to the equity method. In the accounts of the individual companies, ownership interests in the form of share investments are valued at cost, while holdings in general partnerships are recorded according to the equity method.

Balance sheet items of foreign branches and subsidiaries are translated into Norwegian kroner at the rates prevailing on the balance sheet date, while profit and loss items are translated according to exchange rates on the transaction date. Changes in net assets due to exchange rate fluctuations are recorded directly against equity.

When acquiring operations to be consolidated, cost is recorded under identifiable assets and liabilities in subsidiaries, which are recorded at fair value in the consolidated accounts on the acquisition date. Any positive residual value is classified as goodwill. Goodwill is amortised in the group accounts over its expected useful economic life. Any negative residual value, which cannot be linked to assets or conditional commitments, is recorded as negative goodwill and charged systematically to the profit and loss account over the relevant period of time.

Goodwill recorded in the balance sheet is reviewed on each reporting date. Assets generating joint cash flows are considered collectively. Goodwill from the acquisition of companies generating cash flows in foreign currencies is recorded in the balance sheet in the same currency and translated at rates of exchange ruling on the balance sheet date. The need for impairment testing is considered according to the principles described under other fixed assets. Goodwill previously written-down is not reversed.

### CLASSIFICATION AND VALUATION

#### Trading portfolio and banking portfolio

DnB NOR makes a distinction in the accounting treatment of financial

instruments entered into as part of proprietary trading to achieve a gain by exploiting price differences and changes, and agreements regarding the management of other group operations. Agreements in the first category constitute the trading portfolio and are part of DnB NOR Markets' operations, while all other agreements are included in the banking portfolio.

The trading portfolio includes negotiable securities, investment fund holdings, interest rate instruments recorded in the balance sheet, foreign currency positions and financial derivatives.

Income from trading in interest rate and currency positions recorded in DnB NOR Markets' balance sheet is classified as interest income. Other income from the trading portfolio is included under "Net gain on foreign exchange and financial instruments" and "Commissions and fees receivable etc."

#### Lending

Loans are recorded at amortised cost, and income is calculated using the internal rate method. When using the internal rate method, the internal rate of return for the contract is calculated. Discounting contractual cash flows based on the expected life of the financial instrument sets the internal rate of return. Cash flows include front-end fees and direct marginal transaction costs not covered by the customer, as well as any residual value at the end of the expected life of the instrument. Amortised cost is the net present value of such cash flows discounted by the internal rate of return.

Loans are recorded, dependent on the counterparty, either as lending to and deposits with credit institutions or lending to customers.

Interest income on loans is included in the line item "Net interest income and credit commission" using the internal rate method.

#### Impairments on loans

##### Individual write-downs

If objective evidence of a decrease in value can be found, write-downs on loans are calculated as the difference between the value of the loan in the balance sheet and the net present value of estimated future cash flows discounted by the internal rate of return on the loan. The internal rate of return used is the internal rate of return on the loan prior to the identification of objective evidence of impairment, adjusted for changes in market rates up to the measurement date. Changes in the credit risk of the loan due to objective evidence of impairment are not taken into consideration when adjusting the internal rate of return used for discounting.

Objective evidence of a decrease in value of a loan or loan portfolio includes serious financial problems on the part of the debtor, non-payment or other serious breaches of contract, the probability that the debtor will enter into debt negotiations or other special circumstances that have occurred.

Individual write-downs reduce the value of commitments in the balance sheet, and changes during the period are recorded under "Write-downs on loans and guarantees". Interest calculated according to the internal rate method on the written-down value of the loan is included in "Net interest income and credit commissions".

##### Group write-downs

Loans, which have not been individually evaluated for impairment, are evaluated collectively in groups. Loans, which have been individually evaluated, but not written down, are also evaluated in groups. The evaluation is based on objective evidence of a decrease in value after initial recognition that has occurred on the balance sheet date and can be related to the group.

Loans are grouped on the basis of similar risk and value characteristics in accordance with the division of customers into main sectors or industries and risk classes. The need for write-downs is estimated per customer group based on estimates of the general economic situation

and loss experience for the respective customer groups.

Group write-downs reduce the value of commitments in the balance sheet, and changes during the period are recorded under "Write-downs on loans and guarantees". Like individual write-downs, group write-downs are based on discounted cash flows. Cash flows are discounted on the basis of statistics derived from individual write-downs. Interest is calculated on commitments subject to group write-downs according to the same principles and experience base as for commitments evaluated on an individual basis.

Interest calculated according to the internal rate method on the written-down value of the loan is included in "Net interest income and credit commissions".

### Leasing

Finance leases are agreements, which basically transfer all risk and returns associated with the leasing object to the lessee. Such leases are classified as lending. Leasing income is recorded according to the annuity method, where the interest component is recorded under net interest income while instalments reduce the balance sheet value of lending. In cases where another party guarantees the residual value due to the lessee, the residual value is repaid over the term of the contract.

Operational leases are agreements where DnB NOR guarantees the residual value for the lessee at the end of the contract period. Leasing income is recorded under other operating income. Operating equipment is recorded as machinery, fittings and vehicles in the balance sheet. Depreciation for accounting purposes is calculated using the annuity method and classified as ordinary depreciation.

Upon the sale of leasing objects, gains or losses will regularly occur. The net present value of expected future net sales gains is recorded in the balance sheet. Realised gains and changes in value of future sales gains are included in net interest income and credit commissions.

### Factoring

Accounts receivable where the credit risk of the account debtors has been assumed, are recorded under other assets in the balance sheet. Financing of accounts receivable in excess of the credit risk assumed and financing of accounts receivable without any credit risk coverage is recorded under lending in the balance sheet.

In the event that advances paid on accounts receivable for which credit risk has been assumed amount to less than the credit risk, the difference is included under liabilities in the balance sheet. Accounts receivable factored without assuming credit risk and without financing are not recorded in the balance sheet.

### Financial instruments

Financial instruments include securities such as shares, PCCs, bonds and commercial paper, as well as investment fund holdings, other short-term debt instruments and financial derivatives.

### Securities in the trading portfolio

Securities included in the trading portfolio are recorded at market value on the balance sheet date.

Short-term debt instruments included in the trading portfolio are reported at net present value, and unrealised gains and losses are recorded in the accounts.

### Securities in the banking portfolio

Short-term investments in shares are recorded at the lower of the total portfolio's acquisition cost and market value.

Bonds and commercial paper are recorded at the lower of the total portfolio's acquisition cost and market value. Holdings of bonds issued by DnB NOR and included in the banking portfolio are netted against bond debt in the balance sheet.

Issued index-linked bonds are classified as securities issued. The bond element is recorded as a zero-coupon bond. Discounts or yields on the bond are recorded in the profit and loss account over the life of the bond. The value of the bond on the issue date is netted against the

hedging contract, and any gains or losses are recorded in the profit and loss account.

Shares held as long-term investments are stated at cost. If the fair market value of the shares is significantly lower than cost, and the decrease in value is not expected to be temporary, the shares will be written down. Write-downs are reversed when the conditions for writing down the shares no longer apply.

### Financial derivatives

Financial derivatives are contracts stipulating financial values in the form of interest rate terms, exchange rates and the value of equity instruments for fixed periods of time. Corresponding contracts stipulating prices on commodities and indexes are defined as financial derivatives in this context. Derivatives include swaps, forward contracts and options as well as combinations thereof, including forward rate agreements (FRAs), financial futures and agreements on the transfer of securities.

Interest rate and foreign exchange contracts are classified as part of either the trading portfolio or banking portfolio when entered into, depending on the intentions behind the individual agreement.

When financial derivatives are used to hedge securities recorded in the balance sheet, the value of the derivatives is included when stipulating the securities' market value. Positions are hedged when financial instruments are linked to other identified financial instruments on the transaction date, and the maturities and prices of the instruments are closely related.

Financial derivatives included in the trading portfolio are recorded at market value. Gains and losses on financial derivatives included in the banking portfolio are amortised according to the underlying maturity and reported under the related items in the profit and loss account.

When financial derivatives are used to manage risk on balance-sheet items, due to cost factors such agreements are entered into through the business units in the banking group trading such instruments in the market. Internal transactions between the trading portfolio and the banking portfolio are valued according to principles relevant to these portfolios without eliminating internal gains and losses. See note 45.

### Properties and other fixed assets

Bank buildings and other properties in the balance sheet are stated at cost adjusted for previous revaluations with the deduction of accumulated ordinary depreciation and write-downs. Properties belonging to similar categories are evaluated on a portfolio basis. When negative net future cash flows related to leases on vacated and sublet premises are identified, the net present value of the cash flow is charged to the profit and loss account.

Other ordinary operating assets have been valued according to the same principle as that applied for bank buildings and other properties.

On each balance sheet date, fixed assets are reviewed to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated. The recoverable amount is the higher of asset's net selling price and value in use. If the recoverable amount of the relevant asset proves to be lower than its carrying amount, the asset is written down to its recoverable amount.

Such write-downs are reversed when the reasons for writing down the assets no longer apply.

### IT-systems and software

Acquired software is recorded at cost with the addition of expenses incurred to make the software ready for use. Identifiable costs for internally developed software controlled by the banking group where it is probable that economic benefits will cover development expenses at the balance sheet date, are recorded as intangible assets. Direct expenses include expenses covering pay to employees directly involved in the project, materials and a share of relevant overhead expenses. Expenses relating to maintenance of software and IT systems are charged to the profit and loss account as they occur. Software expenses recorded in the balance sheet are depreciated over their expected useful life, usually five years. The need for impairment testing is considered according to the

principles described under other fixed assets.

### Assets and liabilities in foreign currency

Assets and liabilities denominated in foreign currencies classified as monetary items are translated to NOK according to exchange rates prevailing on the balance sheet date.

### ACCRUALS

Income is recorded in the profit and loss account when accrued. Costs are matched against income and charged to the accounts in the same accounting period as related income. Incurred costs related to income earned in subsequent periods are deferred. Costs, which will occur in future periods concerning accrued income, are charged to the profit and loss account during the same period. Future costs not related to future income are charged to the accounts when the costs are identified.

### Recording of interest and fees

Interest and commissions are included in the profit and loss account when earned as income or incurred as expenses. Unrealised gains and losses on loans, deposits and borrowings arising on interest rate hedges in connection with changes in market rates, are amortised under net interest income.

Fees, which represent direct payment for services rendered, are recognised as income upon payment. Fees for the establishment of loan agreements are included in cash flows when calculating amortised cost and recorded under "Net interest income and credit commissions" according to the internal rate method.

### Premiums and discounts on bonds issued

Issued bonds are recorded in the balance sheet at their nominal value with the addition of premiums or deduction of discounts. Premiums and discounts are amortised as an adjustment to current interest expenses until final maturity of the bonds. Discounts on raising other long-term capital are treated correspondingly.

DnB NOR Bank will regularly repurchase bonds issued by itself in connection with ongoing funding activity. Gains or losses resulting from the repurchase and resale of own bonds are in this respect amortised over the remaining term of the bonds according to the straight-line principle.

### Provisions for restructuring measures

If restructuring plans are approved which change the scope of operations or the way operations are carried out, the need for provisions for restructuring measures will be considered. If expenses arising from the implementation of such measures are not linked to future income and the future expenses represent actual commitments on the balance sheet date, the net present value of future cash flows is charged to the accounts and recorded under liabilities in the balance sheet. The provisions are reversed when costs are incurred.

### Pensions

The basis for calculating pension expenses is a linear distribution of pension entitlements measured against estimated accumulated commitments at the time of retirement. Expenses are calculated on the basis of pension entitlements earned during the year with the deduction of the return on funds assigned to pensions.

Pension commitments, which are administered through life insurance companies or pension funds, are matched against funds within the scheme. When total pension funds exceed estimated pension commitments on the balance sheet date, the net value is classified as an asset in the balance sheet if it has been rendered probable that the overfunding can be utilised to cover future commitments. When pension commitments exceed pension funds, the net commitments are classified under liabilities in the balance sheet. Each scheme is considered separately.

Pension commitments, which are not administered through life insurance companies or pension funds, are recorded as liabilities in the balance sheet.

Pension commitments represent the present value of estimated future pension payments, which in the accounts are classified as

accumulated on the balance sheet date. The calculation of pension commitments is based on actuarial and economic assumptions about life expectancy rise in salaries and early retirement. The discount rate used is determined by reference to market yields at the balance sheet date on long term (10-year) government bonds, plus an addition that takes into account the relevant duration of the pension liabilities.

Deviations in estimates are recorded in the profit and loss account over the average remaining service period when the difference exceeds the greatest of 10 per cent of pension funds and 10 per cent of pension commitments.

The financial effects of changes in pension schemes are recorded as income or charged to expense on the date of the change, unless the rights under the new pension scheme are conditional on the employee remaining in service for a specified period.

Pension expenses are based on assumptions determined at the start of the period. Expenses in connection with the accumulation of pension rights are classified as personnel expenses in the profit and loss account. Employer's contributions are included in pension expenses and pension commitments.

### Depreciation of operating assets and intangible assets

Ordinary depreciation is based on the estimated economic life of the asset. The straight-line principle is applied.

### Taxation

Taxes for the year comprise payable taxes for the financial year and changes in the value of deferred taxes and deferred tax assets.

Deferred taxes are calculated on the basis of differences between the profits stated in the accounts and the profits computed for tax purposes, which will be offset in the future. Evaluations are based on the balance sheet and tax position on the balance sheet date. Taxable and tax-deductible timing differences will be netted against each other within the same time interval. Deferred tax assets can be recognised as assets in the balance sheet when it is considered probable that the tax-deductible timing differences may be realised.

### BUSINESS AREAS

The activities of DnB NOR, which also include DnB NOR Bank ASA, and subsidiaries are organised into five functional business areas and four staff and support units. DnB NOR is classified as a separate business area as of 2006. The business areas, which include the activities of DnB NOR Bank ASA and other companies of the Group, are set up according to the customer segments served by the Group as well as the products offered independent of the Group's legal structure. Consequently, profit and loss accounts and balance sheets for the business areas are prepared only for the business areas' combined operations in the DnB NOR Group. A description of the business areas and their accounts is included in the annual report of DnB NOR ASA.

### CASH FLOW STATEMENTS

The consolidated cash flow statements are structured on the basis of banking operations and reflect the main aspects of the banking group's liquidity management, with special emphasis on cash flows relating to lending and funding activities.

### CAPITAL ADEQUACY

The capital adequacy rules are based on the statutory accounts and "pro rata consolidation".

The Norwegian Accounting Standard 6A opens up for eliminating unamortized deviations in estimates relating to pensions in the statutory accounts. Companies in the banking group took this accounting standard into use as from the fourth quarter of 2005 and have chosen to charge deviations in estimates and effects of changes in pension schemes not recorded according to previous accounting principles, against equity. In capital adequacy calculations, equity is reduced by one-fifth on the adjustment each year for five years, starting in 2005.

## Note 2 Important accounting estimates and discretionary assessments

Estimates and discretionary assessments are subject to continual evaluation and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The banking group makes estimates and assumptions concerning the future. The resulting accounting estimates will rarely be fully consistent with the final outcome. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are outlined below.

### Estimated impairment of goodwill

Goodwill recorded in the balance sheet is reviewed on each reporting date. Assets generating joint cash flows are considered collectively. If there are indications of impairment, impairment tests based on future cash flows are carried out. Future cash flows are estimated based on the market situation for comparable assets, taking account of expected price developments, growth prospects, return requirements and the duration of cash flows.

### Income taxes

The banking group is subject to income taxes in numerous jurisdictions. Significant discretion is required in determining the worldwide provision for income taxes in the group accounts. The final tax liability relating to many transactions and calculations will be uncertain. The banking group recognises liabilities related to the future outcome of tax disputes based on estimates of additional taxes. If the final outcome of the cases deviates from the originally allocated amounts, the deviations will affect income tax entered in the applicable period.

### Write-downs on loans

Write-downs will be made if objective evidence of impairment can be identified. Objective evidence of a decrease in value of a loan includes serious financial problems on the part of the debtor, non-payment or other serious breaches of contract, the probability that the debtor will enter into debt negotiations or other special circumstances that have occurred. Criteria for objective evidence for group write-downs in DnB NOR Banking Group include indicators for portfolio quality and business prospects for specific industries.

All write-downs will be made based on discounted values, the discount rate being the loans' internal rate prior to impairment. In principle, all cash flows on commitments and groups should be identified and an assessment must be made as to which cash flows are at risk. Given the large number of commitments that are reviewed at both individual and group level, such estimations must be based on approximations and historical material. Since the group write-down system does not provide access to the actual cash flows included in the relevant commitments, discounting for group write-downs is estimated based on historical data for individual write-downs.

The average discount effect for individual commitments is estimated in relation to discounted cash flows. Based on the ratio of these cash flows to calculated commitment values, an estimate is made of the cash flows represented in the basis for group write-downs.

See note 1 Accounting principles for a further description of the method used for individual write-downs and group write-downs.

### Pension commitments

The net present value of pension commitments depends on current economic and actuarial assumptions. Any change made to these assumptions affects the pension commitments amount recorded in the balance sheet and the pension expense.

The discount rate used is determined by reference to market yields at the balance sheet date on long term (10-year) government bonds, plus an addition that takes into account the relevant duration of the pension liabilities. The type of pension fund investments and historical returns determine the expected return on pension funds. In the past, the average return on pension funds has been higher than the risk-free rate of interest as part of the pension funds have normally been placed in securities with slightly higher risk than government bonds. Over the last 12 years, Norwegian life insurance companies have recorded an average excess return of 1.1 percentage points. The expected return has thus been estimated on the basis of the discount rate plus an addition reflecting past excess returns.

Other fundamental assumptions for pension commitments include annual rise in salaries, annual rise in pensions, anticipated increase in the National Insurance basic amount (G) and anticipated CPA acceptance (early retirement pension). See note 9 Pensions and note 1 Accounting principles.

### Economic life for technical installations and equipment

DnB NOR Bank Group determines the economic life and related depreciation rates for fixed assets. Depreciation is increased if the economic life is shorter than previously estimated, and technically obsolete and discarded assets are written down.

### Systems development

The balance sheet value of IT systems developed in-house and purchased is assessed relative to the discounted value of future cash flows.

### Contingencies

Due to its extensive operations in Norway and abroad, the DnB NOR Bank Group will regularly be party to a number of legal actions. Any impact on the accounts will be considered in each case. See note 46.

## Note 3 Changes in group structure

### Bank DnB NORD

In December 2005, DnB NOR Bank and Norddeutsche Landesbank, NORD/LB, established a joint bank, Bank DnB NORD, owned 51 per cent by DnB NOR Bank and 49 per cent by NORD/LB. Headquartered in Copenhagen, Bank DnB NORD has operations in Denmark, Finland, Estonia, Latvia, Lithuania and Poland. Bank DnB NORD was included in the banking group's balance sheet as from 31 December 2005.

At the beginning of 2006, loan portfolios in Denmark and Finland totalling NOK 4.5 billion were transferred from NORD/LB and DnB NOR Bank to Bank DnB NORD. In consequence, the banking group's capitalised goodwill referring to Bank DnB NORD increased by EUR 1 million, representing compensation to NORD/LB for excess values related to the Finnish portfolio.

### DnB NOR Monchebank

During 2005, DnB NOR Bank entered into an agreement to acquire the Russian bank Monchebank, headquartered in Murmansk. The agreement came into effect on 1 January 2006. DnB NOR Bank paid USD 21.8 million for 97.3 per cent of Monchebank. In connection with the purchase of Monchebank, goodwill representing RUB 302 million was recorded in the banking group's balance sheet, the equivalent of NOK 72.4 million.

At the time of the acquisition, Monchebank had net customer loans of NOK 206 million, commercial paper and bonds of NOK 130 million and total assets of NOK 475 million. The bank's equity totalled NOK 76 million. In 2006, DnB NOR Monchebank recorded profits of NOK 14 million.

At year-end 2006, DnB NOR Bank owned 99 per cent of DnB NOR Monchebank.

### Postbanken Eiendom

DnB NOR Bank ASA established the wholly owned subsidiary Postbanken Eiendom AS in September 2006.

### DnB NOR Hypotek

In the fourth quarter of 2006, DnB NOR Bank's wholly-owned subsidiary DnB NOR Hypotek was merged into the bank. The merger was reflected in the accounts as from 1 January 2006. The purpose of the merger was to strengthen marketing initiatives relating to commercial property financing by bringing together expertise in this field in DnB NOR Bank.

<b>10 188</b>	<b>10 725</b>	<b>Total operating expenses</b>	<b>12 982</b>	<b>11 502</b>

1) These expenses concern the purchase, operation and maintenance of computers and software. The DnB NOR Bank Group's IT expenses totalled NOK 2 210 and NOK 2 088 million for 2006 and 2005 respectively, which in addition to EDP expenses include depreciation, systems development, remuneration to external consultants, as well as salaries and other operating expenses relating to the DnB NOR Bank Group's IT operations. IT expenses in DnB NOR Bank ASA totalled NOK 2 021 and NOK 1 941 million respectively.

2) Other reimbursement to Norway Post is included in "Other interest expenses" and "Total commissions and fees payable on banking services".

## Note 9 Pensions

### Description of the pension schemes

DnB NOR Group has established a joint, defined benefit occupational pension scheme for all employees in Norway in the form of a group pension scheme funded by Vital Forsikring. Pension benefits include retirement pensions, disability pensions and pensions for spouses and dependent children, which supplement benefits from the National Insurance Scheme. Full pension entitlements require 30 years of pensionable service and give the right to a retirement pension corresponding to the difference between 70 per cent of the employee's salary and estimated benefits from the National Insurance Scheme. The pension scheme is in compliance with the Act on Occupational Pensions. In addition to this scheme, around 800 employees in the former Postbanken are covered by a group pension plan in the Norwegian Public Service Pension Fund.

The right to a paid-up policy upon termination of employment only applies to retirement pensions. Disability pensions and survivor's pensions for employees and survivor's pensions for retirement pensioners represent risk coverage without accumulation of capital. The annual risk coverage premium is included in pension expenses.

With few exceptions, Norwegian companies in the Banking Group have adopted the contractual pension (CPA) scheme for the banking and financial services industry. In addition, an agreement on contractual pensions according to public sector rules has been entered into with respect to employees who are members of the Public Service Pension Fund. Provisions have thus been made in the accounts to cover anticipated future CPA acceptance. Upon retirement under a contractual pension agreement, employees continue as members of the group pension scheme, earning benefits up till ordinary retirement age.

The Banking Group also has commitments relating to salaries exceeding 12G (12 times the National Insurance basic amount) and early retirement agreements. Commitments relating to salaries exceeding 12G and early retirement agreements are funded through the Group's operations with respect to employees from the former DnB Group. In the former Gjensidige NOR Group, commitments relating to salaries exceeding 12G, and in general also early retirement entitlements, were organised as group pension insurance schemes funded by Vital Forsikring. This scheme was terminated as at 1 January 2007 and replaced by a pension promise financed through operations. Under other forms of early retirement than CPA, employees resign from the company pension plans but are, upon reaching the ordinary retirement age, compensated for the reduction in benefits earned.

Employer's contributions are included in pension expenses and commitments. In pension schemes where pension funds exceed pension commitments, no allocation has been made for employer's contributions.

Subsidiaries and branches outside Norway have separate schemes for their employees.

Economic assumptions applied in calculating pension expenses and commitments:

Economic assumptions <i>Per cent</i>	Expenses		Commitments	
	2006	2005	31 Dec. 06	31 Dec. 05
Discount rate <sup>1)</sup>	3.9	4.7	4.5	3.9
Anticipated return	4.9	5.7	5.6	4.9
Anticipated rise in salaries	3.5	3.5	4.5	3.5
Anticipated increase in basic amount	3.0	3.0	4.25	3.0
Anticipated rise in pensions	2.5	2.5	2.25	2.5
Anticipated CPA acceptance	40.0	40.0	35.0	40.0
Demographic assumptions about mortality <sup>2)</sup>	K1963	K1963	K2005	K1963

1) The discount rate used is determined by reference to market yields at the balance sheet date on long term (10-year) government bonds, plus an addition that takes into account the relevant duration of the pension liabilities.

2) Statistical assumptions on population mortality, as officially estimated in 1963 and 2005 respectively.

1) In the financial accounts, financial instruments are recorded at market value, while in the tax assessment, they are recorded at realisation value. The same applies to balance sheet transactions which are linked to forward contracts through swap agreements.

2) Tax allowance for dividends received, converted to tax-deductible temporary differences.

3) Concerns mainly tax-deductible differences and losses carried forward in the international units which do not reduce the Norwegian tax base.

1) Refers to the merger with Gjensidige NOR ASA as at 31 December 2003, with DnB Holding ASA as the acquiring company. The savings bank business is considered to be of a very long-term nature.

2) Refers to the acquisition of the credit card portfolio of Gjensidige Bank in 1999. The amortisation period is based on the portfolio's expected remaining economic life at the time of acquisition.

3) Refers to the acquisition of the Norwegian card operations of American Express. The acquisition is part of DnB NOR Bank Group's long-term strategy to provide a full range of card products. Experience shows that such products have a long economic life. Distribution services to the corporate market and merchant agreements were sold in 2006.

4) Refers to the acquisition of Norddeutsche Landesbank's organisation and portfolio in Sweden. The acquisition is part of Corporate Banking and Payment Services' expansion in the Swedish market.

1) Refers to the merger with Gjensidige NOR ASA as at 31 December 2003, with DnB Holding ASA as the acquiring company. The savings bank business is considered to be of a very long-term nature.

2) Refers to the acquisition of Nordlandsbanken at the beginning of 2003. Operations are expected to have long-term value.

3) Refers to the acquisition of the Norwegian card operations of American Express. The acquisition is part of the DnB NOR Bank Group's long-term strategy to provide a full range of card products. Experience shows that such products have a long economic life. Distribution services to the corporate market and merchant agreements were sold in 2006.

4) The amortisation period is based on the company's strategic importance for DnB NOR. IT Solutions' financing solutions within information technology and telecommunications expand the product range in line with DnB NOR Finans' long-term business strategy.

5) Refers to the acquisition of the credit card portfolio of Gjensidige Bank in 1999. The amortisation period is based on the portfolio's expected remaining economic life at the time of acquisition.

6) Refers to the acquisition of Norddeutsche Landesbank's organisation and portfolio in Sweden. The acquisition is part of Corporate Banking and Payment Services' expansion in the Swedish market.

7) Goodwill from the acquisition of 51 per cent of DnB NORD in December 2005.

1) Perpetual subordinated loan capital securities are eligible for inclusion in core capital by an amount not exceeding 15 per cent of total core capital. Kredittilsynet may require that the securities should be written down proportionally to equity if the bank's core capital ratio falls below 5 per cent or capital adequacy falls below 6 per cent. Amounts written down on the securities must be revalued before the distribution of dividends to shareholders or revaluation of equity.

## Note 36 Risk

### Risk management in DnB NOR

DnB NOR Bank ASA is the largest subsidiary of DnB NOR ASA, which is the holding company in the DnB NOR-Group. Risk management in DnB NOR Bank ASA with subsidiaries, "the banking group", is integrated in the Group's total risk management. The Board of Directors of DnB NOR ASA has a clearly stated goal to maintain a low risk profile, which is reflected in the DnB NOR Bank's aim to at least maintain an Aa level rating for ordinary long-term debt. The profitability of DnB NOR will depend on the Group's ability to identify, manage and accurately price risk arising in connection with financial services.

### Organisation and authorisation structure

- *Board of Directors.* The Board of Directors of DnB NOR sets long-term targets for the Group's risk profile. The risk profile is operationalised through the risk management framework, including the establishment of authorisations.
- *Authorisations.* Authorisations must be in place for the extension of credit and for position and trading limits in all critical financial areas. All authorisations are personal. Authorisations and group limits are determined by the Board of Directors and can be delegated in the organisation, though any further delegation requires approval by an immediate superior.
- *Annual review of limits.* Risk limits are reviewed at least annually in connection with budget and planning processes.
- *Independent risk management functions.* Risk management functions and the development of risk management tools are undertaken by units that are independent of operations in the individual business areas.

### Monitoring and use

- *Accountability.* All executives are responsible for risk within their own area of responsibility and must consequently be fully updated on the risk situation at all times.
- *Risk reporting.* Risk reporting in the Group must ensure that all executives have the necessary information about current risk levels and future developments. To ensure high-quality, independent risk reports, responsibility for reporting is assigned to units that are independent of the operative units.
- *Capital assessment.* A summary and analysis of the Group's capital and risk situation is presented in a special risk report to the Board of Directors.
- *Use of risk information.* Risk is an integral part of the management and monitoring of business areas. Return on risk-adjusted capital is reflected in product pricing, profit calculations and in monitoring performance in the business areas.

### Relevant risk measures

- *A common risk measure for the Group.* The Group's risk is measured in the form of risk-adjusted capital, calculated for main risk categories and for all of the Group's business areas.
- *Supplementary risk measure.* In addition, risk is followed up through supplementary risk measures adapted to operations in the various business areas, for example monitoring of positions relative to limits, key figures and portfolio risk targets.

## Note 36 Risk (continued)

### Risk categories

For risk management purposes, DnB NOR distinguishes between the following risk categories:

- *Credit risk* is the risk of losses due to failure on the part of the Group's counterparties (customers) to meet their payment obligations towards the DnB NOR Banking Group. Credit risk refers to all claims against customers, mainly loans, but also liabilities in the form of other extended credits, guarantees, leasing, factoring, interest-bearing securities, approved, undrawn credits, as well as counterparty risk arising through derivatives and foreign exchange contracts. Settlement risk, which arises in connection with payment transfers as not all transactions take place in real time, also involves counterparty risk. Note 40 contains an assessment of the Group's credit risk as at year-end 2005 and 2006.
- *Market risk* arises as a consequence of the Group's open positions in the foreign exchange, interest rate and capital markets. The risk is linked to variations in financial results due to fluctuations in market prices or exchange rates. Notes 37 to 39 contain an assessment of the Banking Group's market risk as at year-end 2005 and 2006.
- *Liquidity risk* is the risk that the Banking Group will be unable to meet its payment obligations. Note 41 contains an assessment of the Banking Group's liquidity risk as at year-end 2005 and 2006.
- *Insurance risk* relates to changes in future insurance obligations due to changes in policyholders' life expectancy and disability rate. Note 48 contains an assessment of the Banking Group's insurance risk as at year-end 2005 and 2006.
- *Operational risk* is the risk of losses due to deficiencies or errors in processes and systems, errors made by employees or external events.
- *Business risk* is the risk of losses due to external factors such as the market situation or government regulations. This risk category also includes reputational risk.

Risk measurement is a field in constant development, and measurement methods and tools are subject to continual improvement. No significant changes were made in routines and procedures for risk monitoring in 2006.

2) Financial derivatives and accrued interest are grouped under "No interest rate".

## Note 38 Interest rate sensitivity

The value of items on and off the balance sheet is affected by interest rate movements. The table below shows potential losses for the DnB NOR Bank Group resulting from parallel one percentage point changes in all interest rates.

The calculations are based on a hypothetical situation where interest rate movements in all currencies are unfavourable for the DnB NOR Bank Group relative to the bank's positions. Also, all interest rate movements within the same interval will be unfavourable for the banking group. The figures will thus reflect maximum losses for the DnB NOR Bank Group. In the trading portfolio, such losses will be charged to the accounts as they occur. In the banking portfolio, the losses will be amortised over the remaining maturity.

The calculations are based on positions as at 31 December 2006 and market rates on the same date.

The table does not include administrative interest rate risk and interest rate risk tied to non-interest-earning assets.

### Interest rate sensitivity for different intervals

Amounts in NOK million	DnB NOR Bank Group <sup>1)</sup>						Total
	Up to 1 month	From 1 months to 3 months	From 3 months to 1 year	From 1 year to 5 years	Over 5 years

## Note 39 Currency positions

The table below shows net currency positions as at 31 December 2006 for various balance sheet items and financial derivatives, as defined by Norges Bank. Net positions in individual currencies may represent up to 15 per cent of the eligible primary capital. Aggregate currency positions must be within 30 per cent of the eligible primary capital. Foreign exchange risk related to investments in subsidiaries is included in the currency position by the amount recorded in the accounts.

Net currency exposure	(270)	270	55	(7 010)	(13)	(140)	244	14

The difference in net currency exposure between DnB NOR Bank and the banking group can mainly be attributed to DnB NOR.

## Note 40 Credit risk

Credit risk represents the chief risk category for the banking group and refers to all claims against customers, mainly loans, but also liabilities in the form of other extended credits, guarantees, interest-bearing securities, approved, undrawn credits, as well as counterparty risk arising through derivatives and foreign exchange contracts. Settlement risk, which arises in connection with payment transfers as not all transactions take place in real time, also involves counterparty risk.

Management of credit risk in the banking group is described in more detail in note 36 Risk.

### DnB NORs risk classification <sup>1)</sup>

<i>Risk class</i>	Probability of default (per cent)		External rating		
	As from	Up to	Moody's	Standard & Poor's	Dominion Bond Rating Service
1	0.01	0.10	Aaa - A3	AAA - A-	AAA - A low
2	0.10	0.25	Baa1	BBB+	BBB high
3	0.25	0.50	Baa2 - Baa3	BBB/BBB-	BBB/BBB low
4	0.50	0.75	Ba1	BB+	BB high
5	0.75	1.25	Ba2	BB	BB
6	1.25	2.00	Ba3	BB-	BB low
7	2.00	3.00		B+	B high
8	3.00	5.00	B1		B
9	5.00	8.00	B2	B	B/B low
10	8.00	impaired	B3, Caa/C	B-, CCC/C	B low/CCC/ C

1) DnB NORs risk classification system, where 1 represents the lowest risk and 10 the highest risk.

<b>Total commitments as at 31 December 2006</b>	<b>828</b>	<b>65</b>	<b>255</b>	<b>1 147</b>

### Loan-loss level <sup>1)</sup>

	2006	2005
Normalised losses including loss of interest income in per cent of net lending	0.27	0.28

1) The calculation of the loan-loss level is based on an evaluation of the probability of future losses (default frequency), exposure at default and the size of the estimated loss (loss ratio). Calculations are based on a certain level of discretion and estimation.

### Collateral security

Depending on the market and type of transaction, the banking group uses collateral security to reduce risk. Collateral security can be in the form of physical assets, guarantees, cash deposits or netting agreements. The principal rule is that physical assets in the form of buildings, residential properties or warehouses should be insured. Evaluations of collateral are based on a going concern assumption, with the exception of situations where write-downs have been made. In addition, factors which may affect the value of collateral, such as concession terms or easements, are taken into account. With respect to evaluations of both collateral in the form of securities and counterparty risk, the estimated effects of enforced sales and sales costs are also considered.

<b>DnB NOR Bank ASA</b>		<b>Commitments according to:</b>	<b>DnB NOR Bank Group</b>	
31 Dec. 2005	31 Dec. 2006		31 Dec. 2006	31 Dec. 2005
		<i>Amounts in NOK million</i>		
310 136	341 900	Home mortgages < 80 per cent of appraised value	381 580	341 785
9 865	10 887	Home mortgages > 80 per cent of appraised value	11 872	10 738
10 667	10 974	Credit card loans	10 974	10 667

## Note 40 Credit risk (continued)

DnB NOR Bank ASA		Past due loans not subject to write-downs <sup>1)</sup>	DnB NOR Bank Group	
31 Dec. 2005	31 Dec. 2006		31 Dec. 2006	31 Dec. 2005
<i>Amounts in NOK million</i>

148	297	1 - 29	350	241
174	89	30 - 59	280	316
49	15	60 - 89	25	55
40	10	> 90	21	71
411	411	Past due loans not subject to write-downs	676	683

1) The table shows overdue amounts on loans and overdrafts on credits/deposits broken down on number of days after the due date that are not due to delays in payment transfers. Past due loans and overdrafts on credits/deposits are subject to continual monitoring. Commitments where a probable deterioration of customer solvency is identified are reviewed for impairment. Such reviews are also carried out for the commitments included in the table in cases where no deterioration of customer solvency has been identified. Past due loans subject to impairment are not included in the table.

### Reposessed assets

Reposessed assets are assets acquired by units within the banking group as part of the management of non-performing and impaired commitments. At the time of acquisition, such assets are valued at their estimated realisable value. Any deviation from the carrying value of non-performing and impaired commitments at the time of acquisition is classified as write-downs on loans. Reposessed assets are recorded in the balance sheet according to the type of asset. When acquiring shares or mutual fund holdings, the assets should be evaluated according to the principles described in note 1 Accounting principles. Upon final sale, the difference relative to carrying value should be recognised in the profit and loss account according to the type of asset. If assets are not intended for long-term possession or use, the assets are classified as current assets. If assets are acquired for own use or for long-term administration and development, the assets are classified as fixed assets.

2) Financial derivatives and accrued interest are grouped under "No fixed maturity".

## Note 42 Remunerations etc.

### The Board of Directors' statement on the stipulation of salaries and other remunerations to senior executives

#### A. Guidelines for the coming accounting year

##### Remuneration to the group chief executive

The salary and bonus of the group chief executive should be determined on the basis of an overall assessment with main emphasis on the following aspects: financial performance, customer satisfaction, employee satisfaction and the Group's reputation. The bonus payment to the group chief executive will be determined based on discretionary assessments and cannot exceed 30 per cent of annual salary. The group chief executive does not receive performance-based remuneration other than the aforementioned bonus.

In addition to bonus payments, the group chief executive may receive benefits in kind such as a company car, newspapers and magazines, free home phone, free mobile and free fax machine. These benefits should reflect the group chief executive's functions in the Group or be in line with market practice and should not be significant relative to his basic salary.

The Group will respect the agreement entered into with the group chief executive, whereby his retirement age is 60 years with a pension representing 70 per cent of salary. If employment is terminated prior to the age of 60, the pension will be paid from the age of 60 with the deduction of 1/14 of the pension amount for each full year remaining to his 60<sup>th</sup> birthday. According to the agreement, the group chief executive is entitled to a termination payment for two years if employment is terminated prior to the age of 60. If, during this period, the group chief executive were to receive income from other employment, the termination payment will be reduced by an amount corresponding to the salary received from this employment. Benefits in kind will be maintained for a period of three months.

##### Remuneration to other senior executives

The group chief executive determines the remuneration of senior executives in consultation with the chairman of the Board of Directors. The Board will honour any existing binding agreements. Salaries should be determined on the basis of the need for offering competitive terms in the various business areas. Salaries should promote the Group's competitiveness in the relevant labour market as well as the Group's profitability (including the desired trend in income and costs). Remuneration schemes must not pose a threat to DnB NOR's reputation or be market-leading. Salaries awarded should ensure that the Group attracts and retains people with the desired skills and experience.

Benefits in kind can be offered to senior executives to the extent such benefits have a logical connection to the employee's functions in the Group or are in line with market practice. Such benefits should not be significant relative to the employee's basic salary.

Bonuses may be awarded to senior executives in the Group on a discretionary basis based on criteria relating to results achieved and other objective criteria based on aspects that the individual manager is able to influence. Such schemes should be performance-based without encouraging undue risk and should not pose a threat to DnB NOR's reputation. In addition to ordinary salaries, bonuses should ensure that the Group attracts and retains people with the preferred competencies and experience. The maximum limit for bonus payments will be 30 per cent of salary. The Board may, however, make exceptions for certain positions to ensure competitive terms. Though remunerations in the latter case should be competitive, they should not be market-leading.

Pension schemes and any agreements on termination payments etc. should be considered relative to other remunerations and be drawn up to ensure competitive terms. The various components in remuneration, pension schemes and severance pay, either alone or together, must not be such that they could be detrimental to DnB NOR's reputation. In accordance with the Group's pension scheme for all employees, pension entitlements will not accrue until the age of 62 and should not exceed 70 per cent of salary. However, the Group will honour existing agreements.

No termination payment agreements will be signed. However, the Group will honour existing agreements.

#### B. Binding guidelines for shares, subscription rights, options etc. for the coming accounting year

Shares, subscription rights, options and other forms of remuneration only linked to shares or only to developments in the share price of the company or other companies within the Group, will not be awarded to the group chief executive or senior executives. Nevertheless, the group chief executive and senior executives will be given the opportunity to participate in a share subscription scheme on the same terms as other employees in the DnB NOR Bank Group.

#### Terms for the chairman of the Board of Directors

Chairman of the Board of Directors of DnB NOR Bank ASA, Olav Hytta, received a total remuneration of NOK 304 000 in 2006, compared with NOK 300 000 in 2005. Benefits in kind from the DnB NOR Bank ASA were estimated at NOK 6 000, compared with NOK 137 000 in 2005.

In addition, Olav Hytta received remuneration for other board positions within the DnB NOR Group. In 2006, he received NOK 356 000 as chairman of the Board of Directors of DnB NOR ASA, compared with NOK 350 000 in 2005, and NOK 45 000 as board vice-chairman in Vital Forsikring ASA for the period 1 January to 31 March 2006, when he withdrew from the Board. The remuneration for the vice-chairman position in Vital Forsikring ASA in 2005 amounted to NOK 200 000. In 2006, pension payments totalled NOK 1 795 000, compared with NOK 1 755 000 in 2005.

#### Terms for the group chief executive

The group chief executive in DnB NOR ASA received an ordinary salary of NOK 4 709 000 in 2006, compared with NOK 4 244 000 in 2005. Benefits in kind amounted to NOK 239 000, as against NOK 364 000 in 2005. The figures represent the total ordinary remuneration to the group chief executive. Costs are divided between DnB NOR ASA and DnB NOR Bank ASA. The Board of Directors of DnB NOR ASA has stipulated the group chief executive's bonus payment for 2006 at NOK 1 200 000. The bonus payment for 2005, paid in 2006, was NOK 1 260 000.

## Note 42 Remunerations etc. (continued)

Svein Aaser retired as group chief executive as at 31 December 2006 with official retirement date being 1 January 2007. During the first year, the pension will represent 100 per cent of the salary at the time of retirement, which will be reduced by an amount corresponding to 10 percentage points the first three years until the pension constitutes 70 per cent for the fourth and consecutive years. The pension, which will be covered through DnB NOR's operations, will be coordinated with pension entitlements from previous employers and be adjusted annually in line with the consumer price index. Costs for DnB NOR in connection with the group chief executive's pension scheme were NOK 4 553 000 for the 2006 accounting year.

Rune Bjerke assumed the position as DnB NOR's new group chief executive on 1 January 2007. The Board of Directors of DnB NOR ASA has stipulated the ordinary salary to the group chief executive at NOK 4 200 000 as of 1 January 2007.

1) Includes remuneration received from all companies within the DnB NOR Group. For those who have received remuneration regarding more than one position, the following amounts are related to DnB NOR Bank ASA:

Per Hoffmann: NOK 225 000

Olav Hytta: NOK 304 000

Bent Pedersen: NOK 253 000

Heidi M. Petersen: NOK 225 000

Ingjerd Skjeldrum: NOK 225 000

2) The 2006 salary for deputy CEO Tom Grøndahl included a non-recurring, additional payment of NOK 720 000 for previous years.

3) The bonus of group chief executive Svein Aaser was stipulated at maximum 35 per cent of annual salary. The bonus payment in 2006 comprised NOK 1 260 000 related to 2005 and NOK 1 200 000 related to 2006. Group executive vice president Ottar Ertzeid, head of DnB NOR Markets, has a performance-based salary including both fixed and variable payments. The 2006 payment included a non-recurring payment of NOK 2 000 000 and a bonus of NOK 4 950 000. The size of the bonus depends on results achieved by the business area and on long-term performance.

4) Loans to shareholder-elected representatives as well as their family members and close associated are extended on ordinary customer terms. Loans to DnB NOR employees are extended on special terms, which are close to ordinary customer terms.

5) The net present value of pension agreements represents accrued pension commitments excluding payments into funded pension schemes. Assumptions used in actuarial calculations of accrued pension expenses and the present value of pension agreements are shown in note 9 Pensions.

6) Also member of the Audit Committee.

7) See information under Group Management.

## Note 42 Remunerations etc. (continued)

### Other information on pension agreements

Ottar Ertzeid, Helge Forfang and Leif Teksum have pension agreements entitling them to a pension representing 70 per cent of salary from the age of 62. Tom Grøndahl and Åsmund Skår have pension agreements entitling them to a pension representing 70 per cent of salary from the age of 60. Evlyn Raknerud has a pension agreement entitling her to a pension representing 66 per cent of salary from the age of 60.

### Subscription rights programme for employees

There was no subscription rights programme for employees at year-end 2006.

8.1	7.1	Core capital ratio (per cent)	6.8	7.7
11.2	10.6	Capital ratio (per cent)	10.2	10.6

- 1) Perpetual subordinated loan capital securities can represent up to 15 per cent of core capital. The excess will qualify as perpetual supplementary capital.
- 2) Calculations of capital adequacy include a total of NOK 744 million in subordinated loan capital in associated companies, in addition to subordinated loan capital in the banking group's balance sheet.
- 3) Upon implementation of NRS 6A (IAS 19) in 2005, unrecognised actuarial gains/losses for pension commitments were charged to equity in the accounts. The Ministry of Finance has established a transitional rule whereby three-fifths of the amount recorded against equity can be included in capital adequacy calculations as at 31 December 2006. This effect will be reduced by one-fifth yearly up to and including 2008.
- 4) Primary capital and nominal amounts used in calculating risk-weighted volume deviate from figures in the DnB NOR Bank Group's accounts as a different consolidation method ("pro rata consolidation") is used in calculating capital adequacy in relation to associated companies.

All numbers are presented in accordance with rules prevailing at the time in question.

## Note 45 Financial derivatives

### General information on application of financial derivatives

Financial derivatives are traded to manage liquidity and market risk arising from the banking group's ordinary operations (banking portfolio). In addition, the banking group employs financial derivatives in its own account trading (trading portfolio).

Financial derivatives are contracts stipulating financial values in the form of interest rate terms, exchange rates and the value of equity instruments for fixed periods of time. Corresponding contracts stipulating prices on commodities and indexes are defined as financial derivatives. Derivatives include swaps, forward contracts and options as well as combinations thereof, including forward rate agreements (FRAs), financial futures and agreements on the transfer of securities.

"Over the counter" (OTC) options or forward contracts are contracts entered into outside the stock exchange. The contracts are tailor-made according to investor requirements with respect to the underlying object, number, price, expiration terms and maturity. The advantage of OTC derivatives is that customers are not limited to standardised contracts and can buy the precise position they wish. The disadvantage compared with the standardised market is that it can be difficult to find other contracting parties and to sell the contracts on the secondary market. Clearing of non-standardised OTC options is regulated by separate standard conditions stipulated by the clearing house NOS ASA, and the relationship between the actors in the market is regulated through agreements similar to those in the standardised market.

The following derivatives are employed in the DnB NOR Bank Group:

- Forward contracts: a contract to buy or sell terms of interest, amounts in foreign currencies, shares or commodities on a specified future date at a fixed price. Forward contracts are tailor-made contracts traded between counterparties in the OTC market.
- FRAs: agreements that fix the interest rate for a future period for an agreed amount. When the contract matures, only the difference between the agreed interest rate and the actual market interest rate is exchanged.
- Interest rate futures: standardised contracts where the counterparties agree to exchange specific interest rate instruments at a fixed price on a specified date. The contracts are traded on an exchange. The value of interest rate futures follows the price trend on underlying interest rate instruments.
- Swaps: transactions where two parties exchange cash flows on a fixed amount over an agreed period. The majority of swaps are tailor-made and traded outside exchanges. The most important types of swaps traded by DnB NOR Bank Group are:
  - interest rate swaps in which fixed rates of interests are exchanged for floating or floating rates of interest are exchanged for fixed
  - cross-currency interest rate swaps in which parties exchange both currency and interest payments

## Note 45 Financial derivatives (continued)

- Options: agreements giving the buyer the right, but not the obligation, to either buy (call option) or sell (put option) a specific quantity of a financial instrument or commodity at a predetermined and fixed price. The buyer pays a premium to the seller for this right. Options are traded both as OTC contracts (tailor-made) and as standardised contracts.
- Interest swaptions: option contracts affording protection against an interest rate rise (for the buyer/borrower) or an interest rate fall (for the seller/lender). By paying a premium in advance, the customer gains the right, but not the obligation, to use predetermined interest rate swap contracts in the future. Depending on the structure, the swaption may be exercised on a specific future date (European option) or at any time during the term of the option (American option).

### Further information on the use of financial derivatives in DnB NOR Markets

DnB NOR Markets acts as market maker and is obliged to furnish both offer and bid prices for specified option, forward or futures series with a maximum differential between the offer and bid price, together with a minimum volume. Market makers always trade for their own account. The purpose of own account trading, in addition to making a market, is position taking, which means intentional risk-taking within the foreign exchange, interest rate and equity markets to achieve profits arising from favourable price, exchange rate and index fluctuations. Arbitrage, that is profit taking from fluctuations in prices, exchange rates and indexes for the same product in various markets, is also part of own-account trading.

Customer trading entails structuring and marketing financial derivatives for customers, enabling them to transfer, modify, take or reduce prevailing or expected risk. The majority of derivative transactions relate to customer trading.

<b>Netting</b>						
Effect of netting agreements <sup>4)</sup>		(18 649)			(18 073)	

1) Nominal amount represents the underlying principal used as a basis for calculating interest income, interest expenses and net trading profits in the profit and loss account.

2) Market prices represent the average of purchase and sales prices quoted by information services accessible to the public. In some cases, market prices are calculated by extrapolation or interpolation of available prices.

3) Cross-currency interest rate swaps are included under foreign exchange agreements.

4) Includes only contracts where legally binding agreements with the customer covering such netting have been signed.

Financial derivatives included in the trading portfolio are recorded at market value in the accounts, and changes in market value are recorded as they occur. With respect to agreements included in the banking portfolio, gains and losses are amortised over the remaining maturity.

Internal transactions between the trading portfolio and the banking portfolio are valued according to principles relevant to these areas of business without eliminating internal gains and losses. Up till the end of 2006, a total of NOK 1 150 million was recorded as gains on such transactions, while losses of NOK 778 million were recorded in 2006 alone.

1) As at 31 December 2006, DnB NOR Bank ASA has issued a guarantee for the loans in DnB NOR Boligkreditt AS with NOK 22 899 million.

2) NOK 75 816 million in securities as at 31 December 2006 has been pledged as collateral for credit facilities with Norges Bank (the Norwegian central bank). According to regulations, these loans must be fully collateralised by a mortgage on interest-bearing securities and/or the bank's deposits with Norges Bank. As at 31 December 2006, DnB NOR Bank Group had borrowings of NOK 10 billion from Norges Bank.

### Contingencies

Due to its extensive operations in Norway and abroad, the banking group will regularly be party to a number of legal actions. None of the current disputes are expected to have any material impact on the banking group's financial position.

In 2004, DnB NOR Bank issued a writ against the Norwegian government, represented by the Central Tax Office for Large Companies, requiring that the tax assessment for 2002 be invalidated. The bank claimed that the tax authorities made incorrect use of the realisation principle with respect to interest rate and currency swaps, as no tax credit was awarded for net losses in the tax assessment. In 2006, the bank lost the case in the District Court. The outcome will have no material effect on the result for the banking group. The decision has been appealed.

### Post balance sheet events

DnB NOR Bank ASA long-term credit rating was raised to Aaa by Moody's in February 2007. There have been none other special events after balance-sheet date.

# Auditor's report for 2006

## To the Annual General Meeting and Supervisory Board of DnB NOR Bank ASA

We have audited the annual financial statements of DnB NOR Bank ASA as of December 31, 2006, showing a profit of NOK 9 659 million for the parent company and a profit of NOK 8 872 million for the group. We have also audited the information in the directors' report concerning the financial statements, the going concern assumption, and the proposal for the allocation of the profit. The annual financial statements comprise the balance sheet, the statements of income and cash flows, the accompanying notes and the group accounts. The regulations of the Norwegian accounting act and accounting standards, principles and practices generally accepted in Norway have been applied in the preparation of the financial statements. These financial statements are the responsibility of the Company's Board of Directors and Group Chief Executive. Our responsibility is to express an opinion on these financial statements and on other information according to the requirements of the Norwegian Act on Auditing and Auditors.

We conducted our audit in accordance with the laws, regulations and auditing standards and practices generally accepted in Norway, including standards on auditing adopted by The Norwegian Institute of Public Accountants. These auditing standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. To the extent required by law and auditing standards an audit also comprises a review of the management of the Company's financial affairs and its accounting and internal control systems. We believe that our audit provides a reasonable basis for our opinion.

In our opinion,

- the financial statements have been prepared in accordance with the law and regulations and give a true and fair view of the financial position of the company and of the group as of December 31, 2006, and the results of its operations and its cash flows for the year then ended, in accordance with accounting standards, principles and practices generally accepted in Norway
- the company's management has fulfilled its duty to produce a proper and clearly set out registration and documentation of accounting information in accordance with the law and good bookkeeping practice in Norway.
- the information given in the directors' report concerning the financial statements, the going concern assumption, and the proposal for the allocation of the profit are consistent with the financial statements and comply with the law and regulations.

# Control Committee's Report

## **To the Supervisory Board and the Annual General Meeting of DnB NOR Bank ASA**

The Control Committee has carried out internal controls in DnB NOR Bank ASA and the banking group in accordance with law and instructions laid down by the Supervisory Board.

In connection with the closing of the accounts for the 2006 financial year, the Control Committee has examined the Directors' Report, the annual accounts and the Auditor's Report for DnB NOR Bank ASA.

The Committee finds that the Board of Directors gives an adequate description of the financial position of DnB NOR Bank and the banking group, and recommends the approval of the Director's Report and annual accounts for the 2006 financial year.
